In the governors of the New York Stock Exchange for investigation.

development, a widespread inquiry into which was precipiated by the address of Prof. William Z. Ripley of Harvard University before the Academy of Political Science in New York, are puzzling bankers, business

Of intimate moment alike to the smallest investor in Main Street and to the greatest capitalist in Wall Street, the problem is, succinctly, that of the wanishing power of stock-holders, a development at once new and of fundamental concern to the system of private property wherein nsibility and ownership have been traditionally linked.

Ownership and Control

In short it is the growing disasso ciation of the ownership of big business corporations from the control STATE PRIMARY of the investors. It is the sale of great blocks of non-voting stock to the public, while the directoral powers of these corporations are retained by intermediary interests which have no direct accountability for their efficient management or any of their corporate acts.

In the discussion of this questionthe advancing disfranchisement of the stockholder-which is just beginning to receive thoughtful examination by competent students of economics, the essential issue is one of Jay R. Benton, today announced his assessors from cities and towns in public policy. While the procedure candidacy for the Republican nomiall parts of the State were in atoility of removing the responsibility ers is being called in inquiry by terous qualified and practical ob-ers of corporate finance.

Probably the one who is chiefly sponsible for focussing attention on this relative innovation is Prosor Ripley, who is author of a ersity of important works in the ld of business, finance and trust velopment, and one whose varied rious hearing. Professor Ripley es two basic changes in the nature and conduct of corporations which, checked, the institution of private property, and concern capitalist and worker alike.

Intermediary Interests

As indicated, the more influential change on which Professor Ripley sounds a warning, is the divorce of the ownership of property, as represented by securities issued by corporations or trustees, from direct relty for its able conduct, and party unity in the 1926 election, in as has been recently the case, the in-jection into the organizations of in-termediary financing interests which neither directly manage nor own them, but which control the voting How is this accemplished? League Circles Question If Court Protocol Text Conditions Will Not Prevent Participation

SATISFACTION FELT IN BRITISH PRESS

Case of Turkey and Mosul Decision Cited as Example of Obstacle That May Arise

Bu Cable from Monitor Bureau

LONDON, Jan. 28-There has not vet been time for the press to discuss the United States adherence to the World Court, but the satisfaction which is felt generally in regard thereto is somewhat mitigated by the reservations attached by the Senate. Indeed considerable doubt is felt in legal circles here as to whether the conditions insisted on by the Senate will not in practice prevent the United States participation becoming operative. The most important reservation in this connection is the one laying down that no advisory opinion affecting the United States must be rendered without the United

Turkey's Case Cited

Article 14 of the League Covenant gives the Council and Assembly power to ask an advisory opinion on any subject they wish and it is pointed out that if the states already adhering to the World Court admit the right claimed by the United States Senate they will be opening the door to similar reservations by other states, which would seriously impair the court's usefulness as the agency of world peace

To cite only one recent example: If no advisory opinion could have been given by the World Court without Turkey's consent the League Council would have been unable to give a decision on the Mosul dispute. This being so, will the states accept American adhesion with such a res ervation attached? It is impossible to answer the question yet, but informed opinion feels certain that there will be considerable hesitancy and acceptance is thought to depend on whether this particular reservation can be restricted to the United

Reservations to Swanson Resolutions Adopted Practically as Presented

Special from Monitor Bureau WASHINGTON, Jan. 28-The Senate of the United States has given its 'advice and consent" for trance of the Nation into the membership of the Permanent Court of International Justice by a 76 to 17 ballot, 14 more than the required

The final vote climaxed one of the

most determined struggles in the historic chamber, a contest on the outcome of which there could be no question, and yet, one in which the determination of the opposition maintained to the very last moment. The issue was non-partisan. Party affiliations were discarded in the deiberations on the numerous counts. The anti-Court stand of James E. Watson (R.), Senator from Indiana, Administration leader and the simi-

wo-thirds.

Robinson (R.), Senator from Indiana, were expected.
Originally they had been listed as ro-Court, but in the last weeks they had indicated by their votes on minor issues in the contest and by state-ments that their positions had

ar one of his colleague, Arthur R.

Party associates attributed this to the influence of the Ku Klux Klan. It is interesting to note, however, that another Senator credited with Klan backing, Earle B. Mayfield (D.), Senator from Texas, voted for the Court throughout.

The Final Roll Call

For adherence: Republicans— Bingham, Butler, Cameron, Capper, Couzens, Cummins, Curtis, Dale, Deneen, Edge, Ernst, Fess, Gillett, Goff, Gooding, Hale, Howell, Jones, Washington Keyes, Lenroot, Mc-Kinley, McLean, McMaster, McNary, Means, Metcalf, Norbeck, Norris, ddie, Pepper, Phipps, Reed, Pennsylvania; Sackett, Shortridge, Smoot, Stanfield, Wadsworth, Warren, Weler and Willis-total 40. Democrats -Ashurst, Bayard, Bratton, Broussard, Bruce, Caraway, Copeland, Edwards, Ferris, Fletcher, George, Gerry, Glass, Harris, Harrison, Heflin, Jones, New Mexico; Kendrick, King, McKellar, Mayfield, Neely, Oerman, Pittman, Ransdell, Robinson, Arkansas; Sheppard, Simmons, Smith, Stephens, Swanson, Trammel Tyson, Underwood, Wheeler-total 36.

Against adherence: Republicans-Borah, Brookhart, Fernald, Frazier, Harreld, Johnson, La Follette, Moses, Nye, Pine, Robinson, Indiana; Schall, Watson and Williams-total 14. Democrats-Blease and Reed, Missouri--Farmer-Labor The three absentees were Senators

Du Pont, Delaware, and Greene, Vermont, Republicans, and Dill, Democrat. Washington. It was announced that Senator Dill was paired against the Court, with the other two absent The resolution by which the Senate

gives its "advice and consent" and also the terms under which the United States may join the World Court were submitted by Claude A. Swanson (D.), Senator from Virginia. As adopted it is in a materially revised form from the one originally introduced by Mr. Swanson. changes were made to meet objections of the Court opponents that the interests of the United States were not sufficiently safeguarded.

It was stated during the debate on Vednesday that the substitute resolution with its protective reservations was written by Senate Court leaders with the assistance of John Bassett Moore, the American member of the Court, who is visiting in the United States. The resolution as adopted and under which the Presi-dent will seek American membership in the Court is as follows:

Resolution of Adherence

Whereas, the President, under date of Feb. 24, 1923, transmitted a message to the Senate, accompanied by a letter from the Secretary of State, dated Feb. 17, 1923, asking the favorable advice and consent of the Senate to the adherence on the part of the United States to the protocol of Dec. > 16, 1920, of signature of the statute for the Permanent Court of Internafor the Permanent Court of Interna-tional Justice, set out in the said message of the President (without accepting or agreeing to the optional clause for compulsory jurisdiction, contained therein) upon the con-ditions and understandings here-after stated, to be made a part of the instrument of adherence: therefore

Resolved:-(two-thirds of the senators present concurring), That the Senate advise and consent to the Senate advise and consent to the adherence on the part of the United States to the said protocol of Dec. 16, 1920, and the adjoined statute for the Permanent Court of International Justice (without accepting or agreeing to the optional clause for compulsory jurisdiction contained in said statute), and that the signature of the United States be affixed to the said protocol, subject to the following reservations and understandings. ing reservations and understandings, which are hereby made a part and

condition of this resolution Reservations Adopted

The reservations approved by the Senate provide in effect: That adherence to the World Court shall not involve any legal relation between the United States and the League of Nations.

That this country be permitted to

the Court shall not be amended with-out consent of the United States. That there is to be no secret advisory opinions, and that the Court on the shall not, without consent of the Chamber.
United States, entertain any request for an advisory opinion on any ques-tion in which the United States has

That adherence to the Court shall American questions.

Long Road Yet to Travel

Although potentially an adherent to the international tribunal, it will be many months before the United States will become an actual accredited member. Because of the reservations that the Senate prescribed, President Coolidge must obtain the ceptance of these restrictions by e 48 nations already members of the Court. This acceptance is assured, Court supporters claim, but, nevertheless, it will take many months to complete, as the process is

one of treaty-making.

The final vote came at 6:50 p. m. Even at this hour it was unexpectedly early. For it was 10 minutes past 5 o'clock before the Senate took its first ballot of the day on a reservation by George H. Moses (R.), Senator from New Hampshire, to the effect that the United States became a member of the Court with the understanding that the opinions of the Court should not be enforced by war. The five hours between on, when the Senate met, and the

vote, were spent in debate. Impressive Moment in Debate

During this period there was what was probably the most impressive of the contest. William Borah (R.), Senator from Idaho, leading opponent to Court adherence, made a short but effective argument. The crowded galleries and the Senate floor were silent and tense. When he took his seat, Thomas J. Walsh (D.), Senator from Montana, rose and began a rebuttal of Senator Borah's

Mr. Borah asked for permission to interrupt. It was granted, and then ensued an exchange worthy of the Senate of the United States, the importance of the subject and the bilities of the senators engaged.

In contrast to this episode was the spectacle staged by Cole Blease (D.), Senator from South Carolina, clustering anti-court Senator. During a tepid discussion on a reserva-tion by Henrik Shipstead (F.-L.), ing the number of votes of the tion of judges on the Court, Mr. Blease took the floor and demanded that every State in the Union be given a vote in such elections. As a defense for his plan he pointed out

lira against any possible adverse effect the yearly payments might have on Italian currency. Finally, it is believed that not the least among the beneficial effects of the Italo-

Details of the Settlement

Signed by Finance Ministers by agreeing to pay roughly £4,000,-000 annually for 62 years, a total of £272 250,000. This was revealed by publication of the terms of the agreement signed by Count Volpi Italian Minister of Finance, and Winston Churchill, British Chancellor of the Exchequer.

amounting to £22,000,000, as security for war loans. The total Italy presence. He repeatedly turned toward her gallery as he sarcastically complimented the Democrats and the terms accorded by England on their victory.

"Yes, the deed is done," he said ous than those Italy obtained at

> The first payment, £2,000,000, is to be made on Feb. 15, next. Thereafter installments are to be paid according to the following schedules £4,000,000 annually for two years; £4,250,000 annually for four years, and thenceforth £4,500,000 annually until the final year, when a payment of £2,250,000 will close the account. Italy's £22,000,000 gold deposit

against the war loans will be repaid beginning in the fiscal year 1928-29 in eight installments of £1,250,000 each, and after these eight years in annual installments of £191,000 until Sept. 15, 1987. Great Britain will

On the face of the agreement Great Britain, is living up to the offer contained in the famous Bal-four note, that it would only ask its creditors to repay an amount equal to the £33,000,000 a year it must pay the United States. According to the suggested proportions of the Balfour note Italy would have to pay £1,000,000 more a year than it has

just agree to pay.

If the French Government honors
M. Caillaux's tentative agreement to pay £12,500,000 a year an account of France's debt to Great Britain, even with reparations payments of £10,000,000 a year from Germany and with another £4,000,000 annually which the minor war debtors are expected to pay, the British tax payers still will have to pay about £2,000,000 each year out of his own

It is pointed out that even if Great Britain is able to receive approximately £31,000,000 from these, sources to meet its American annuities of £33,000,000 it will have sacrificed half the capital owed it and interest on its debts for many years.

rator, milking machine, washer, house refrigeration. Other operations which planned to test are farm equipment, feed mixing, silo filling hay hoist, fertilizer mixing, sewing machine, electric incubator, electric brooder and apple grader.

The work is being conducted by the experiment station in co-operawith the state and national committees on the relation of electricity to agriculture, and is being carried on for the benefit of the New England area.

National Committee

The National Committee is composed of representatives from the American Farm Bureau Federation. National Electric Light Association Power Farming Association, American Society of Agricultural Engineers, United States Department of Agriculture, United States Depart-ment of Interior. The State of New Hampshire was selected as being representative of the area.

The following utility companies who provide electric service to the above farms are also rendered valuable assistance: Twin State Gas & Electric Company, Concord Electric Company, Hampshire Road Electric Light & Power Company, Grafton County Power & Light Company, Exeter; Hampton Electric Company, Franklin Light & Power Company. The tests are run under a three-year period. The three remaining farms will probably be selected by spring.

CANDY WORKERS' WAGE ANNOUNCED Commission Sets \$13 Mini-

mum for Women and Girls

A minimum rate of \$13, an increase of 50 cents a week for women and girls with a year's experience in candy factories, is provided under a new wage decree just entered by the Minimum Wage Commission. The decree will go into effect March 1 and will supersede the existing minimum rate of \$12.50 which has been in effect since January, 1920. The decree provides a special minimum rate of \$9 for inexperienced workers irrespective of age. This re-places the \$8 minimum for workers

The new decree is based upon the commendations of the reconvened wage board for the candy occupa-tion. The board estimated the cost of living as \$13 a week, recommending a minimum rate to correspond.

POSSIBILITIES OF FUTURE NEW YORK

MASSIVE towering buildings ... gar-dens on topmost terraces . . . overhead streets. . . These are some of the possibilities of the future depicted on canvas at Wanamaker's.

In the years to come New Yorkers may dwell in the upper reaches of sky-piercing buildings, where there will be plenty of light and clear air. While below in the lower stories of the same buildings, business will hum along during the day. People may travel from place to place without ever descending to the street

Come and see these conceptions which leading artists and architects have painted of the future Titan City. Interesting and highly possible are some of the plans for the solution of the problems of the city's future.

This is part of the Ter-Centenary Pictorial Pageant at Wanamaker's showing New Yorkers how their city looked in the past, how it has grown to the present, and how it may develop in the future.

THE CHENGIAN SCIENCE MONITOR BOSTON THURSDAY, JANUARY 28, 1928

ANGLO-FRENCH

Many Important Matters Discussed by Foreign Ministers of Two Countries

By SISLEY HUDDLESTON

By Special Cable PARIS, Jan. 28-Sir Austen Cham. berlain, British Foreign Minister and Aristide Briand, French Premier and Foreign Minister, began their conversation this morning and continued this afternoon on a number of important subjects. Sir Austen Chamberlain, who has been absent from England recently, apparently desired to exchange views reaching any decision, for the Cabinet must be consulted. Nevertheless a tentative understanding has been arrived at on the followings points: 1. The German demand for a re-

duction of the Allied armies in the 2. The entry of Germany into the League of Nations.

3. An adjournment of the preparatory conference on disarmament, which England says was first suggested by France and France says was first proposed by England.

4. The actual state of German armaments regulated by treaty. There was some further discussion on interallied debts provoked the situation in the East and relations with Russia ignored Russia's Objections Met

The Christian Science Monitor representative is informed by a trustworthy source that the objections Russia raised to Switzerland as the meeting place for the conference had been overcome and a compromise agreed, by which the Russian demands for guarantees of personal safety would be granted.

It is noteworthy too, that Sir Eric Drummond, secretary of the League of Nations came to Paris to participate in the deliberations. At a lunch given in honor of Sir Austen Chamberlain, it is significant that Paul Doumer, Finance Minister, spoke. It is an open secret that he has the intention as soon as the Parliamentary debates are ended to proceed to London to seek an accord with Winston Churchill, Chancellor of the Exchequer, for it is recognized that the depression of the franc must continue, whatever financial measures are taken until there is a debt settlement. Altogether by the variety and number of the subjects raised, Sir Austen Chamberlain's visit is unquestionably important.

Anglo-French Cordiality Above all, cordiality reigned, for France and England are truly desirous of working together. Even the VISCOUNT KATO domestic situation is affected by the demonstration of esteem in which M. Briand is held abroad. Already there is a hint in the Chamber of Deputies, where interminable speeches are being delivered on M. Doumer and the Cartel projects, that the Radicals are prepared to accept a mutually satisfactory arrange-ment, and the prospect of a minis-terial crisis is evaporating.

Regarding the entrance of Gerinto the League it is anticipated that the formal demand will lief that although Germany is incacious to hold a conference when Germany was in the League and the Locarno Pact therefore operative. Delay Is Probable

Other considerations already indicated appear to make a delay likely, Dunraven and Mount but various dates, including midhis seat in the Senate.

and reading rooms. An order to this effect has been issued by the local board of education. Directors of libraries and reading rooms who fail to comply with the decree by Feb. 1 will be held responsible.

Geneva (A)—France, in connection with the movement for international reform of the calendar, has notified the League of Nations that the French Government favors fixing a definite date for Easter between April 1 and 15.

Albany. N. Y. (P)—The Senate has confirmed the appointment of Lieut.-Col. William N. Haskell, U. S. A., to be major-general commanding the New York State national guard.

World News in Brief

Washington (P)—At the request of the Bahamas Government, the Post Office Department has given notice that all mail from the United States for the Bahamas Islands will be dispatched exclusively by means of steamships sailing from New York. In the scale message the Bahamas Government stated that all communication between Nassau and Miami had been suspended indefinitely. No other reason was given.

April, are now mentioned. The French view is that some surveil-Colorful Railway Posters AMITY REIGNS lance of German armaments is necessary until all the provisions of the

treaty are fulfilled.

The recent report of the Commission of Control is not regarded as satisfactory. Yet both France and England wish to avoid any action to dissipate the Locarno atmosphere.

The British are inclined also to forces in the Rhineland, now numbering 75,000 men, though the Germans themselves required before the war only 45,000 police in these regions. Incidentally M. Briand supported the Polish demands for a permanent seat on the Council of the League which will balance the Ger-

temporary home. Soon some used lumber was delivered and a single worker was seen arranging this into neat piles. He worked industriously and after a time the floor was laid and the walls and roof of a house commenced to be

One morning after a wind and rain storm the commuters saw only a pile of wreckage where there had been promise of a home. Upon inquiry is was found that the family consisted of father, mother and daughter. The famed, last evening discussed before daughter had a position in the city and the father was employed at night so he had been using some of the hours he might have devoted to sleep

to the building of their house.

A group of commuters who live some miles beyond and who had been interested in the progress of the work, on learning the details, raised a sufficient fund to buy new material, and a carpenter and his help-ers gave their services until a new house was roofed in. It was soon finished and painted, and today stands nestled in its beautiful setting as a house that brotherly love built.

STATE SALARY RISE OPPOSED

Head Protests Move of New Employees' Union

Contending that salaries and working conditions among Massachusetts state employees are satisfactory at present, Charles P. Howard, new Commissioner on Administration and Finance, representing Governor Fuller, opposed the re-classification of employees which is being sought by the Commonwealth Service Association, the so-called state employees' union," in a hearing late yesterday before the Legislative Committee on Rules.

Mr. Howard and his predecessor, Thomas W. White, now collector of Internal Revenue, appeared before the committee to meet attacks made upon the commission and the Governor by Leland Powers, George F. Drury, Herbert Parker, and John F. Miller, counsel representing the employees, who asserted that the commission has defied the Legisla-ture and broken faith with state emoloyees in refusing to grant salary

Challenges Labor Statement

While attorneys for the workers state employ was excessive and imlied unfavorable working conditions, Mr. Howard challenged the turnover figures, and said that there has been a 21 per cent salary increase since while living expenses have gone down one-third. Although it was admitted that state employees receive less pay than similar workers all probability, a tax rate of \$32 in private concerns, the difference is will be declared this year. Sentiment in the committee, after all the arguments were presented, apparently was opposed to a general reclassification. It seemed likely that no investigation will be ordered.

MAYOR CONSIDERS WATER RATE RISE

Minimum to Be \$12-Flat Rate Instead of Sliding Scale

Mayor Nichols is considering a rise in Boston water rates, which amounts to almost a 50 per cent increase. The water division of the Department of Public Works submitted to the Mayor yesterday a reschedule of water charges which would add largely to the city's income, a problem which to-day is commanding more of Mr. Nichols' attention than any other

phase of his duties. What alone causes the Mayor to hesitate in promulgating the new indicated by the water rates as Mayor provides for an increase of minimum charges from \$8.80 to \$12; abolition of the present sliding the charging of a flat rate, propor-tionately higher than that of the If adopted, the increased charges would appear on April

By their total efforts the students amassed \$59,933, or an average of \$132 for each student earning money.

done for money is cheerfully described by the worker as "lots of The highest recorded earning was \$890 made by a student who managed a small store in Holyoke and worked as a typist in the summer. More than half the girls who earned money made less than \$100 for the year, however. Of the total earnings of the students \$41,246 were made in

Not From Actual Need

From this survey it was concluded that no girl can now earn all of her college expenses, even by working in the summer; for the tuition and living amounts to \$900 without clothes, books, spending money, and traveling. In many cases the stimulus to earning comes not from actual need, but simply from a desire to have more fun and more of that minor property dear to the school-girl which is rapidly developed in the college contacts.

where steady earning requiring no initiative on the part of the student is desired, the college itself provides the greatest opportunities—in waiting on tables carrying messages, doing extra office work, or in various subsidiary positions in the library, post office, and at the switch board. But students of initiative, who seek a maximum of earning with a min-imum of drudgery, prefer to work out their own enterprises. There is the firm of "Mary-Margaret," caterers, who get up individual suppers and parties on order, advertising themselves as prepared to offer "good food and service of distinction."

Then there is "Francy Lou" the

Then there is "Emmy Lou" the costumer, who offers to clothe her customers complete in "stunning out-fits" for any party they are con-templating. There also has been a profitable lending library called "At the Sign of the Gold Fish Bowl."

Arts of Advertising Most of these college "firms" use all the arts of modern advertising, and the post office corridor, which is the most popular spot on the campus, owes something of its neverending interest to the displays and advertisements of the students' firms

FEBRUARY 26 NAMED 'POTATO DAY' BY THE GOVERNOR OF MAINE

Demonstration of Good Will Toward 'King of Vegetables' Urged by Executive

AUGUSTA, Me., Jan. 27 (A)--Friday, Feb. 26, was designated as "potato day" by Gov. Ralph P. Brewster in a proclamation. In it he called attention to a resolve passed by the last Legislature, saving: "It is the expressed desire of the

Legislature that 'all our people may arrange a strictly potato diet to the end that their physical condition may be improved and the material welfare of the State may be con

In the preamble of the resolve, belief was expressed that "the future prosperity of the State of Maine de pends in a large measure upon the potato industry, and that all the people must in some substantial way demonstrate their interest and good will toward the 'king of vegetables,' to insure the permanence and success of the industry."

B. U. DEBATE TEAM TO MEET OKLAHOMA

in Series of 12 Contests

With 18 consecutive victories to heir credit, the Boston University debating team will face its impor tant test of the season when it begins a series of 12 debates on Feb. 10, when the B. U. men will meet University of Oklahoma. Five of these will be title contests, and still an-

other is pending with Dartmouth.

The debate with Oklahoma will be on the child labor question, with B. U. arguing that an amendment should be adopted. On the following night, the team will take the negative against Fordham on the World Court adherence question, the exact phraseology of which will depend upon any Senate action in the mean time. The debate will be radiocast by Station WNAC. Both contests will be in Jacob Sleeper Hall, 688 Boylston Street.

On Feb. 27 the team will oppose Washington University of St. Louis in Boston on the question of recognition of Russia. In March the team meets Lafayette and Rutgers, opposing entrance into the League of Nations. In April, B. U. will face Massachusetts Agricultural College, Maine and Colby on the subject of Government ownership of coal mines. They will meet also Arizona and Western Reserve on child labor, and Queen's College of Canada on representative government. Pennsylvania follows and, possibly, Dartmouth.

E. J. HOLMES IS NEW ART MUSEUM HEAD

Egyptian Works to Be Installed During Spring

Election of Edward Jackson Holmes as permanent director of the Boston Museum of Fine Arts was announced today by the board of directors. Mr. Holmes, who has been acting director for nearly a year, is a graduate of Harvard and a mem-

entire time to the interests of the advertising club of Worcester.

Museum of Fine Arts, the Students' institutions in which he is deeply in terested. He has always been a Annual Carnival to Have erous donor of art works and funds

warm friend and supporter of the museum, and his mother, Mrs. Walter Scott Fitz, has long been a gen to the museum. Mr. Holmes himself is very much interested in Italian primitives, and not long ago one of his collections was placed on exhibi tion in one of the galleries. He re cently gave the museum a Sargen study in oil, which attracted much attention during the memorial exhi-

The pointed Mr. Dows Dunham assistant curator of the Egyptian department, and he will return to America in the spring, taking up his duties here in April. For a while he was loaned to the Egyptian Government to assist the authorities there in their exploration and excavation of ancient sites. As assistant curator he will have charge of the installation packed, and others that are on the way, and are expected as the result of discoveries by Dr. Reisner's party at Giza. Dr. Reisner himself will remain in command in the field its sixteenth year, the largest strictly until the tombs at Giza, now being opened, have been fully explored and advices from him are momentarily expected.

Miss Gertrude Townsend, assistant in the department of western art, has been made keeper of textiles in that department.

CHICOPEE OPPOSES WARE RIVER PROJECT

CHICOPEE, Mass., Jan. 28' (Special)—The Chicopee Board of Trade has gone on record as opposed to the taking of the Upper Ware River for Metropolitan Boston's water supply under the plan proposed by the Gow Commission. A committee compris-ing Frank P. Cobb, Joseph M. Grise and James E. Hafey has been appointed to represent the board at hearings which are expected to be held on the bill.

The action of the board is of special significance because of the location of Chiccopee interests below the Rivers, and therefore their indirect relation to the taking of the Upper Ware. Sentiment has been strong in the towns along the Ware River against its taking, but there has not been such pronounced opposition before from the cities and towns below its junction with the Swift River.

CONVENTION DATES SET

Declaring that it is impossible to be a trustee of the institution; operate a highly specialized and complex educational institution under the minute supervision and control all branches of the state educational

A long list of trustees of the inmission on Administration and stitution, representative farmers, frinance, faculty, trustees, and farm wives, educators, and others, addressed the committee and taburesentatives of 50,000 farmers in the lated a series of irritations and State, vigorously urged that more grievances alleged to have resulted authority be given trustees of the from the detailed supervision of the college, in a hearing today before state commission over the college's

the legislative Committee on Educa- work. Delays in publishing vital reports which were useless if issued after a certain date were recounted: delays in engaging teachers, demonfaulty administration of experiment stations, and many other criticisms of the present system were ad-John Chandler, speaking for the

trustees, said they are greatly con-cerned over the situation in which the administration commission exercises drastic authority in the matter commission. Occasionally the trustees of the college desire greatly to retain the services of some specialist in the instruction field. This they cannot do, because the state em-

ployee in question cannot receive a larger salary increase than the standard annual advance. As a result, he added, the morale of the institution Philip F. Whitman of Sunderland,

speaking for the farmers in his section, said they are desirous of obtaining speedy information through the bulletin service of the college When the institution was under the control of the trustees, he went on, the farmers would receive the college bulletins in the course of a month after the material had been prepared. Now, he said, it is three nonths before they receive the information they are looking for.

Dr. Arthur W. Gilbert, Commissioner of Agriculture, in favor of the neasure, said that the system in effect in Massachusetts had been tried out in New York state in con-nection with the administration of one of its colleges. The plan was unsuccessful. A change was made whereby the trustees of the college were given a greater degree of authority and the plan worked out

"Carmen"

The Chicagoans yesterday afterpresented Bizet's "Carmen," with this cast:

Fernand Ansseau
Ernesto Torti
Edouard Cotreuil
Mary Garden
Alice d'Hermanoy
Devora Nadworney
Georges Baklanofi
Clara Shear
Desire Defrere
Jose Mojica
Eugenio Correnti
ez, conductor

Although the visitors' representation of "Carmen" is familiar, there was conducting for the first time stration agents, andother workers; here; Miss Shear was making her local début as Micaela; it was Miss dances.

Mr. Grovlez disclosed himself as a conductor of many excellencies. His demeanor is quiet, he has none of the outward characteristics of the of fixing salaries. Such power, held virtuoso of the baton. His qualities by an outside body, he said, has a are revealed rather in the way the material effect upon the welfare of the institution. At present, he exactly and chorus were always unmorrow discuss the "Values for plained, all salary increases must der control, and the resulting per-be approved by the administration formance was not only accurate, but lively and expressive.

Miss Shear, warmly greeted by her friends in the audience, sang and dents judge after the official judges one of the most pallid rôles in opera. Doubtless she would be more inter esting in a more grateful part.

Miss Garden repeated her estabished interpretation of the Gypsy girl, acting with fervor when fervent acting was called for, and singing well. This, of course, is not one of her best rôles but it provides opportunity for free exercise of her gaminerie.

Mr. Ansseau confirmed previous good impressions of his Don José, singing particularly well, and again making the observer rejoice in the knowledge that it is possible for an realism into his appearance and his acting. The Carmen who faces this José's wrath has something to worry

Mr. Baklanoff's Escamillo was of his customary high quality, and the minor rôles with rare intelligence, with Miss D'Hermanoy and Messrs. Mojica Defrere deserving special mention. One of the most finished bits of the

(Continued from Page 1)

anxious to see growers concentrate more upon the fragrance of new carnations by the breeding of scented varieties in order to obtain again the real, old-fashioned clove scent which breeding for size has considerably diminished.

One of the points to be emphasized during the convention is the new attempt that will be made by the association to interest amateurs, members of garden clubs and horticultural societies to grow and exhibit carnations. There has been tradi-tionally little provision made for them in the schedule of exhibitions, and since they constitute the real class were several novel features about yesterday's performance. Mr. Grovlez dassociation that they should be encouraged to take an active part in of buyers, it is felt by officials of the

BUENOS AIRES LOGGED FOURTH NIGHT OF TEST

Monitor Listening Post Hears LOZ, LOX, OAX, CZE, and WKAQ

"LOZ, Buenos Aires, Argentina," OAX 49 plus, and CZE 42. greeted the ears of the listeners at yesterday afternoon, arriving at meters. WGY came in the strongest dusk.

The location is ideal, facing a

We were most surprised that was made possible.

Mexico City and Porto Rico clearly, despite some hetrodyning by American stations, but we were out for bigger game. We finally picked up activity reported it attractively as some music quite clearly and then activity follows: came the thrilling announcement at

The static was very heavy, but despite this these stations were heard morning, Russia had the pleasure of everyone quite clearly. And the by everyone quite clearly. And the listening to 'The Star-Spangled thrill of realizing that we were hear-Banner' across 6000 miles of space ing a person speak in Buenos Aires, 6000 miles away at the same identical that they actually pronounced the words, and that these winged their way all the way up to us to be picked up on a lone wire and eventually turned into audible sound at our ears was well worth the preparation for the tests.

We tried hard for Europe, but English language. here the wall of static was even greater than with South America and the code interference was also bad. We did hear one station coming in very clearly with a soprano and tenor singing a duet, but the convented us hearing the call letters, livered by that this station could not be logged. It was down around 280 meters. We then heard two stations meters. We then heard two stations of the country of the strongly hetrodyning each other Scientist, in Boston, Mass., Jan. 28, which could have easily been put on the loudspeaker if they could have Los Angeles, 467 meters wavelength. been separated. Of course, guessing was then in order, and we figured it was probably 2LO in London and p. m., Pacific standard time, will be the Brussels, Belgium, station, as given in Philharmonic Auditorium.

they are but two meters apart.

Mr. Wardsworth's location is exand will be radiocast under the auspices of the Churches of Christ, the Scientist, of Los Angeles. cellent for reception despite the name it carries of an Indian chief who headed a tribe in that section DE FOREST MEDAL Massachusetts. Paskamansett, static than a name. A tall pole has been erected on a hill just back of the house, well supported by guy wires. From this a 200-foot antenna Medal in the annual senior competiis run directly into the living room, tion at Yale University for writing hich was the radio operator's cabin and delivering orations. PUBLIC URGED

United States as Set-

ting an Example

OTTAWA, Jan. 28 (Special)-

Speaking in the House of Commons

yesterday on the merits of public

ownership, W. F. MacLean, Conser-

vative member for South York, cited

the National Reserve Bank system

of the United States as the finest

instance of public ownership in the

world today, through its rediscount-

ing at actual cost. It was encouraging, the member said, local banks

throughout the country and setting an example that he urged Canada

to follow. He also referred to the Interstate Commerce Commission "as administering all the railroads of the United States and doing a

The Canadian National Railways

had proved surprisingly successful in spite of ruinous competition, said

Mr. MacLean, to offset the growing rivalry of motor transport, air and

steamship service. He though that the railroads should develop similar

services of their own and utilize the new steam electric car to the

fullest extent.

He criticized the present duplica-

tion of railroads as a "curse to Can-

ada," and was of the opinion that the

Canadian Pacific Railway was now

ready to merge with the National

Lines. A merger would permit of the

scrapping of 5000 miles of road and

the saving of \$200,000,000 annually. He appealed to Parliament to be "big

respective of politics and private in-

terests. Canada's task today was to

take profiteering out of the public services, and he thought that the

United States was leading the way in

great public service.'

NONVOTING PLAN UNDER SCRUTINY

(Continued from Page 1)

fessor Ripley replies by pointing to tends, are all too frequently marking the recent operations of Wall Street. Thus, as he explains, one corpora-tion lately sold 598,000 shares of non-voting Class A stock, but re-served 2000 of the total 600,000 shares as Class R stock carrying ex-clusive voting rights. Of these circumstances Professor Ripley asks;

tune, for honest and economic man-agement of the business? The pro-rarely exert their powers of control, and that therefore the elimination of oters stand to lose only the amount of their stake—a minus quantity in dollars, leaving aside, of course, the moral obligation. It is the public stockholders who stand to lose their conditions?

Diffusion of Ownership

the danger, if it be such, of the widespread separation of ownership from ntrol. It is accelerated diffusion of an increasing proportion of this ownership to employees and con-sumers of the corporation's product, and thus with a larger number of shareholders the easier it is for a concentrated block of minority holders to dominate the management.

The net result of both changes is the assumption of an absolute control of intermediaries - most commonly bankers, so-called-in place of the former responsibility for di-rection which, theoretically at least, rested upon the shoulders of the actual owners," Professor Ripley says in his amplified discussion of this question in the Proceedings of the Academy of Political Science. "Both these tendencies menace

alike the welfare of the private own, ers themselves and of the working classes; and they put the public in-terest in the sound and straightforward management of these businesses in jeopardy—not because bankers, as such, are more frail than other people in general, but simply because the possession of uncontrolled power is always certain to entail abuse, whereby both innocent and guilty are alike dragged down. The result, therefore, unless present tendencies are taken in hand, will necessarily be the extension of the activity of such bodies as the Federal Trade Commission, acting for the protec tion of those who have unwittingly ade themselves wards of the state

in respect of their possessions. New Corporations Formed

"All kinds of private businesses are being bought up by banking houses; and hew corporations are being substituted for the old, in order that the purchase price (and more) may be recovered by sales of shares to the general public. But the significant change is that the new stock, thus sold, is entirely bereft of any voting power, except in case of actual or impending bankruptcy. "General stockholders, to be sure,

have always been inert, delegating most of their powers of election. But, at worst, they might always be stimuany event, they all fared alike as respects profits or losses. "Under the new style of corpora-

badly deprived of all rights in this badly deprived of all rights in this direction, and new preferred stocks are sold up to the hilt of the value of the assets, if not beyond. The issues are called preferred stocks. They are really bonds. And, instead, as formerly, of being limited to a half or to full and complete unmitigated integrating of the tangible assets, no two-thirds of the tangible assets, no limit is now set, except the powers of absorption of the investing pub-

formation,"

D. W. HAINES IN SEMIFINALS

Two Other Players Reach This Round in Class C Squash Tennis

Special from Monitor Bureau NEW YORK, Jan. 28—Representa tives of the Harvard Club, City Athletic Club, Columbia University Club, and New York Athletic Club, will batand New York Athletic Club, will bat-tle out the semifinal round of the United States class C squash tennis championhip today, on the New York Athletic Club courts. Two of the members of the Columbia University Club team, unbeaten leaders in the team championship, were defeated yesterday, leaving only D. W. Haines, the leader of the team, still in the run-

yesterday, leaving only D. W. Haines, the leader of the team, still in the running.

Haines scored the easiest victory of the day, defeating S. R. Jandorf, Fraternities Club, in straight games. 15—2, 15—9. His all round ability and his volley work, was far superior to ordinary class C play, and he held the lead throughout both games with ease.

Gardner Hirons, the second Columbian, lacked his usual power, and seemed unable to get properly set for his strokes. As a result, William Platt, who has returned to play for the Harvard Club after a lapse of several years, outsteadied him in the critical moments, and finally wore down the speed of his drives and won by a score of 15—18, 15—12, 15—8.

The feature of the day was the victory of Chester Goldburg of the Club, over J. L. Kerbeck, the third of the Columbians. Kerbeck ran off with the first game, after trailing at 6—10, and ran up a lead of 11—3, in the second. At this point Goldburg uncovered the finest series of service and low-angle shots that has been seen in a Class C match this season, and scoring point after point, reached 14—11 in the next two-innings. Kerbeck managed to stem the tide for a moment, and made one point, but on his next hand, Goldburg won the game. 15—12. Then he ran nine more points in the next game before losing service, and finished the match two innings later. The complete score was 12—15, 15—12, 15—9. The summary:

CLASS C SQUASH TENNIS CHAM-PIONSHIP—Fourth Round

PIONSHIP—Fourth Round
Chester Goldburg, City Athletic Club,
defeated J. L. Kerbeck, Columbia University Club, 12—15, 15—12, 15—4.
D. W. Haines, Columbia University
Club, defeated S. R. Jandorf, Fraterniiles Club, 15—12, 15—9.
William Platt, Harvard Club, defeated
Gardner Hirons, Columbia University
Club, 15-18, 15-12, 15-8.

Five U.S. Boats In Ahead of Cubans

HAVANA, Jan. 28 (P)—Five American-owned yachts of the star class led two Cuban boats across the line yesterday in the first of a series of three races for the Cuban trophy donated by the Government. The distance was approximately 18½ kilometers.

Irex III, Sonny and Maia II, Long Island boats, placed first, second and fourth, respectively, with the Jane of New Orleans Gulf, third, and Old Coon of Narragansett Bay, fifth. The time was 1h. 45m 56s., with Sonny 54s. behind.

OREGON CONTINUES SUCCESSFUL MARCH

PULLMAN, Wash., Jan. 28 (Special)

—The University of Oregon basketball team continued successfully its march toward the Pacific Coast Conference honors by defeating Washington State College, 34 to 22, in one of the fastest games seen here recently. Oregon maintained a substantial lead throughout the contest, the score at half-time peing 24 to 6. The winners were superior in all departments of the game.

A. K. Westergren '27, Oregon guard, was high-point man for both teams with 13 points, while his excellent floor work was also a feature of the game. For Washington State, F. N. Averill '28 and W. B. Henry '28 did the best work. The summary:

OREGON WASHINGTON STATE Sunther, Iminki, If....rg, Koenig Hobson, rf....lg, Averill Okerberg, Edwards, c...c, Brumblay

OPEN GOLF TOURNEY TO START ON JULY 8

NEW YORK, Jan. 28 (P)—The United States open golf championship, held last year at Worcester, Mass., the first week in June, will be played more than a month later this season over the links of the Scioto Club, Columbus, O. Selection of the three-day period from July 8 to 10 by George Sargent, president of the Professional Golfers' Association and instructor at Scioto, was aumounced, vesterday.

change in the date of the fixture will "Change in the date of the fixture will make it convenient for participation of professionals from this country in the British open, the final round of which has been fixed for June 21. James M. Barnes, who won the British little last year, expects to compete again along with Eugene Sarazen, Walter C. Hagen, Leonard H. Diegel, Macdonald Smith and John C. Farrell.

Dates and courses for the qualifying tournaments of the American open have not yet been chosen.

Chicago's Defense

Only 97 points in five games have been made against the Chicago five—by far the best defensive showing. Coach Norgren's boys need this protection, however, for they have been taking many shots and sinking very few. They lost, 26 to 24, to Minnesota at Minneapolis yeaterday. Their total points are 30 in five games. Lack of basket-making ability lost two games for them, but the only team allowed to get out of hand was Purdue, which won a 24-to-17 game last week. The Maroons hang to their rivals like adhesive tape, but they have not a man among the first 10 in scoring. The nearest is Theodore Zimmerman '28, forward, with 23 points.

As Chio State lost its only previous game away from home, but appears to win everything in Columbus, the Maroons are prepared to stake everything or a vicery here.

Maroons are prepared to stake everything for a victory here Saturday and then hope for the best when they go to the Ohio city the following week-

end.

More power and organization in the attack is needed by Iowa in visiting Indiana on Monday and receiving Minnesota on Friday. The team appears good on defense, and has some scoring ability, but lost three of its five games. Coach J. M. Barry's outfit will have a hard time repeating their 29-to-22 win over Indiana. This was made on their own floor, which visiting teams say is strangely lighted. 54s. behind.

Ernest Ratsey, one of the Long their 29-to-22 win over Indiana. This Island Sound junior skippers, is pilot of the Irex III and has his father as crew. He has captured three races in as many days, two of which were University, 37 to 34, at Bloomington.

OVER MISS VLASTO IN STRAIGHT SETS

CANNES, France, Jan. 28 (P)—Continuing her triumphant march over all opponents in the tennis tournaments along the Riviera, Miss Helen N. Wills, United States champion, today defeated Miss Rosine Vlasto, in straight sets, 6-0. 6-2.

Miss Wills thus advanced to the

third round in the singles of the Galla tournament. Miss Vlasto is a cousin of Miss Didi Vlasto, ranking No. 2 player in France and finalist against Miss Wills in the Metropole tournament.

ment.

Miss Viasto gave Miss Wills very little opposition, and it appeared that if the American champion had chosen to extend herself she could have won without the loss of a game.

Miss Wills continued victoriously through the third round by defeating Miss Cadle of England 6—0, 6—3.

GERMANY WILL BE INVITED TO RACE

NEW YORK, Jan. 28 (P)—European countries, including Germany, will be invited to send speed boats to America next Aug. 21 and 22 to participate in the Gold Cup Regatta at Manhasset Bay, L. I.

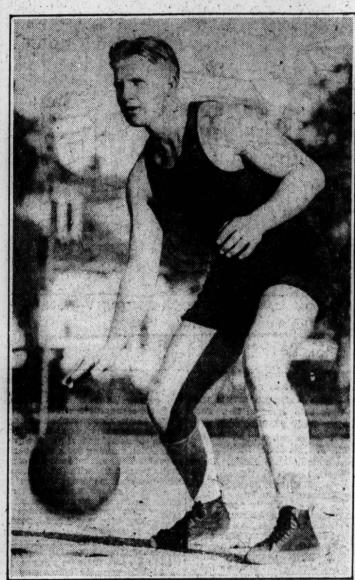

Germany was barred for 16 years

ANOTHER HOLE IN ONE MADE RELLEAR, File., Jan. 28—The first hole in one of the season here was made yesterday by Miss Frances Hadfield, of Milwawkee, playing in the women's golf tournament with Mrs. G. W. Elkins, of Philadelphia as an opponent. It was made on the 142-yard ninth, Miss Hadfield won her match by 6 and 5. The victory placed her in the final with Mrs. G. H. Stetson, of Philadelphia, who defeated Mrs. Csleb F. Fox, of Philadelphia, by 4 and 3.

SOUTHERN CALIFORNIA HAS TO DEPEND UPON NEW PLAYERS

Five of Best Basketball Prospects Not Available to Start the Season-Two Lettermen Form the Nucleus for the Trojan Quintet

LOS ANGELES, Calif., Jan. 28 (Special)—Prospects for a successful season in basketball have received a considerable set-back at the University of Southern California during the past few weeks, for at present, there are only two lettermen eligible for competition from the 1925 quintet. K. H. Boyer '26. captain of the Troajn squad, and Manual Laraneta '27 are the two courtmen that have had pre-

referee's decision after two extra periods.

C. F. Servais '27, a younger brother of Coach Servais, started in as the regular 125-pound varsity man this season, but had to quit. It was Coach Servais' plan to use his brother in the 115-pound division against Princeton, figuring that he would be able to work his way down from the 125-pound aranks after the Columbia meet.

G. D. McDonald, who started the season in the 135-pound division worked down to the 125-pound class against Princeton and gained a decision over A. T. Tekirian '27, on time in mit. McDonald, who comes from Jamestown High School, Jamestown, N. D. was a runnerup in the intercollegiate championships last year and is

Farrel Now In Tie With Gorman

New Senior Racer Is Proving Surprise_Thunberg Scores in Two-Mile Event

WORLD'S SPEED-SKATING CHAM-PIONSHIP STANDING Skater and Home
Charles P. Gorman, St. John
O'Neil Farrel, Chicago
Edward Murphy, Chicago
William Logan, St. John
Richard Donovan, Endicott
Lesite Boyd, New York
A. C. Thunburg, Finland

ST. JOHN, N. B., Jan. 28 (Special)— By winning the half-mile and three-quarter mile events yesterday in the world's championship speed-skating meet O'Neil Farrel of Chicago, skatmeet O'Neil Farrel of Chicago, skating his first season as a senior, drew
up to Charles P. Gorman of this city
for the lead, each having scored 80
points in the five races on the first
two days of the three-day meet.
Yesterday afternoon the officials of
the meet announced that Richard
Donovan of Endicott, N. Y., who had
finished first in the final of the mile
Tuesday, had been disqualified as he
had not qualified in the semifinals and
as a result Gorman was given first as a result Gorman was given first place, while Farrel was placed third, in the three-quarter mile event and Gorman was only able to finish second

Gorman was only able to finish second in the three-quarter mile event and Farrel gained 40 points on him.

A. Clas Thunberg, the Finiander, managed to get placed in one final, finishing third in the two-mile race, and his showing in the-other events was much better than on the opening day. He won both his heat and his semifinal in the three-quarter, but was unable to finish better than fourth in the final. He was third to Edward Murphy in their heat in the half-mile, second to Farrel in the semifinal, but was again unplaced in the final.

In the women's 220, Ruth Muhimeyer of Chicago and Leila Brooks of Toronto, a double winner on Tuesday, won the heats, but the latter was unplaced in the final which was taken by the Chicago girl. The results were:

Men's Senior Three-quarter Mile—Won

by the Chicago girl. The results were:

Men's Senior Three-quarter Mile—Won
by O'Neil Farrel, Chicago: Charles P.

MINNESOTA DEFEATS CHICAGO FIVE, 26-24

MINNEAPOLIS, Minn, Jan. 28 (Special)—The University of Minnesota basketball/team defeated the University of Chicago quintet at the Minneapolis armory Wednesday night,

It was the first Conference victory for the Gophers who returned to their home court after a disastrous opening road trip of three games. Wednesday they flashed a powerful offensive to forge ahead of the Marqons near the start of the contest and held it against an improved Chicago dash in the second half.

At the end of the first held Mind.

GLASGOW, Jan. 28 (#)—Replayed games in the first round of the Scottish football Association cup competitions yesterday resulted as follows: Heart of Midlothian 1, Dundee United 1; Airdrieonians 7, Queen of South 0; Stenhousemuir 2, Vale of Leven 1; Dumbarton 2, Buckle Thistle 1.

ARMY WINS CLOSE GAME WEST POINT, N. Y., Jan. 28—In a hard fought and closely contested game the United States Military Academy wor from Fordham University on the basket hell court vesterally by a score of 25 ball court yesterday by a score to 25. The game went into two five-minute sessions.

"The EVERY-DAY BOOK, or the GUIDE TO THE YEAR: Relating the Ceremonies, Manners, Customs, and in Past and Present Times; Being A Series of 5000 Anecdotes and Facts; Forming A History of the Year, A Calendar of the Seasons, And A Chronological Dictionary of the portant and Diverting Information, For Daily Use and Entertainment. "Compiled from Authentic Sources

By WILLIAM HONE." There are eighteen more lines on the title-page which I forbear to quote. Hone had studied to some purpose the advertisements of shows" at Sadler's Wells and Bar-tholomew Fair. as his title indicates; but he does not feel that even this announcement does his book full justice, and therefore he amplifies it enormously in his Explanatory Address to the Reader, enumerating a hundred alluring topics he intends achieved its purpose, apparently, in teaching to write a host of young teaching to write a host of young in which "information that is useful men and women who, without it, and will be combined with amuseto treat and summing up, with the Here, then, is your true omnium gatherum. When people talk about

learned how, so that now they need It was no easy task to compile these only learh what, to write. eight hundred and fifty-two quarto pages with double columns in a single year, writing on nearly every subject under the sun, for the most part accurately and always agree-ably. Or rather, that task would not not go very far back to find any namber of burly and amiable blunderers who never took a course in freshman composition, who knew of the Every-Day Book. The interstant of the course of the tree of this time he filled in by have been easy to another man stices of his time he filled in by writing and publishing The Table Book and The Year Book, which are who had a large number of ex-almanac volumes, and by writing at lent ideas to put into one. And the same time several other more serious works. All this while he was taxning away from the brilliant dodging in and out of bankruptcy, intitle work that passes for literature today and going back to those lider boo's that seem bursting with thought and reflections wedged in anyhow, as though they had been thought together with a spade. hoveled together with a spade.
For an example, one might do acquittal on every count against the attack of powerful political enemies. Every-Day Book, which was "run-ning" in England just a hundred age of the man which brought him through all things smiling, one would not like to remember that when he had finished his herculean task of writing he was for a short time imprisoned for debt.

> doing it. One can imagine how he with the cry of "Copy!" always in his ears. In the morning he bur-rows through piles of ancient learn-ing at the British Museum; at noon he rushes home to Ludgate Hill to write up his findings; after lunch he goes round the corner to take his notes on Bartholomew Fair, and then drives off in a cab to remonstrate with George Cruik-shank, who does his illustrating. As a "true-born Englishman," he could not help lowing oddities. He was what he himself called a "nicknacki. tarian.' No Frenchman could have made a book so heterogeneous as this ary, is order itself in comparison. This is essentially an English book, as the similar collections made by Southey and Robert Chambers show.
> One doubts whether any American
> could have made it. Hone reminds usnow and then of Benjamin Franklin, but he had very little of Frank-lin's business ability and less still of his precision and regularity which kept order among his multifarious

interests. One man at least in Hone's London saw the merits of this miscel-English, and praised it whole-heartedly. Even if they had not been signed, one would know that these verses, which appeared just a century ago in the London Magazine were written by Charles Lamb:

I like you, and your book, ingenious In whose capacious, all-embracing

EMILIE BLACKMORE STAPP Synopsis

udge Wiseman and his young aghter, Penelope, lived in the ddle West, Margaret, a faithful stehwoman, being their house-sper. The Judge suddenly awakened the fact that Penelope, then a shman in high school, was growing faster than he wished. He felt the perhaps the time had come when would be better for her to go away school, and decided to send her to ooks Manor, where her mother had ne hefore her.

CHAPTER IV

CHAPTER IV

First Impressions at Brooks Manor

T SEEMED to Penelope that she was in another world when she left Miss Andrews at the door of her room to prepare for dinner. All her life she had been accustomed to a room alone, certain of its refuge when she needed quiet. She would have been thankful had this now been assured her. Instead, she found herself in the company of her roommate, a southern girl who was beginning her second year at Brooks Manor.

Virginia Lee turned from the mirror where she was giving a last finishing touch to her hair.

"Better hurry, Penelope, for we literated to hear the rest of her story. That was all. She said this morning we'd let it go this time, but —but well, I'd feel more honest to tell. I did break the rule, and yes, Dad, I wanted to. That's the worst of it. You would tell I know, and I should feel more honest if I did."

It is wanted to hear the rest of her story. That was all. She said this morning we'd let it go this time, but —but well, I'd feel more honest to tell. I did break the rule, and yes, Dad, I wanted to. That's the worst of it. You would tell I know, and I should feel more honest if I did."

It is twanted to hear the rest of her story. That was all. She said this morning we'd let it go this time, but —but well, I'd feel more honest to tell. I did break the rule, and yes, Dad, I wanted to. That's the worst of it. You would tell I know, and I should feel more honest to tell. I did break the rule, and yes, Dad, I wanted to. That's the worst of it. You would tell I know, and I should feel more honest to tell. I did break the rule, and yes, Dad, I wanted to hear the rest of let.

the assembly room. I know you feel sort of strange now. Every new girl does, but you'll soon learn to love it."

busy as bees this afternoon. She spoke with an easy assurance that was most comforting.

The First Evening

evening at Brooks Manor nor her feeling of shyness when faculty and pupils were all gathered in the assembly room, someone playing the piano, and the older girls dancing with the younger and trying to make

twig; and at list thought you have their deed suppose that every leaf which the suppose that every leaf which the deed hardly ever comes here. Mother is face. In actual fact, however, this any comes have been supposed as a suppose that every leaf which the suppose that every leaf which the deed and suppose that every leaf which the suppose that every leaf going abroad again soon."

Penelope longed to think of some

remarkable thing her father had done, for it was hard to remain silent. "Virginia," she said, "you ought to know my father. Perhaps he doesn't wear diamonds, but he's a splendid judge. He never makes mistakes, and even all the prisoners

Virginia and Penelope saw but little of each other this first day.

the closet and smaller things in her dresser drawers in such a way that she might hope to find them when needed. The spot for which she cared the most was the center of the desk where she had placed her father's treasured photograph in its silver frame. His face was full of expression and his eyes looked so straight into her own that she felt as if the picture talked to her.

The Silence Bell

Several days later when Penelope and Virginia were preparing for bed they were chatting busily as usual Suddenly a bell rang and Virginia stopped in the middle of a sentence "Oh, do finish what you are telling me," urged Penelope, "Does it really make any difference about that silence bell?"

Virginia laughed and then putting

quickly to sleep; the other, wideeyed and wakeful, a little astounded

Key to maze published Jan. 21:

Virginia laughed and then putting her fingers on her lips, with a virtuous expression climbed into bed.

"I remember you did say something about it that first night," continued Penelope serenely, "but how can I ever wait until morning to hear the rest of that story?"

With these words the room was quiet, one girl, secretly much amused at Penelope breaking a well-known rule that there should be instant silence in every room after the ringing of the bell, falling after the ringing of the bell, falling after the ringing of the bell, falling between the ringing of the bell, falling between the ringing of the bell, falling after the ringing of the bell, falling between the ringing between the ringing of the bell, falling between

ime about everything. Some old first principal tasks is to girl will choose you right away, too. She will be specially nice to you and help you to get acquainted. She'll treat you like a guest, and take you everywhere. Then the old girls always give a party for the new and—"

Miss Andrews

Just then the door opened and Miss Andrews came first to Penelope. She held gently but firmly the restless little hand. "Virginia, I am depending on you to help make Penelope comfortable and happy, just as someone did you a year ago," she said. A few minutes later she said good night and the room was quiet. It seemed to Penelope she had been asleep but a few minutes when Virginia was urging her to hurry and firmly the restlement of the teres to the tree. One of the said. The beautiful colors of the said. A few minutes later she said good night and the room was quiet.

The Work of the Leafe was to provide shelter, to protect. For this purpose were built in the days of the printing press, and that, too, is why their leaves are as sign to us that other changes, of which we see nothing, have been taking place in the immost tissues of the tree. One of the said. A few minutes later she said good night and the room was quiet.

The Work of the Leafe was to provide shelter, to protect. For this purpose were built in the heady so the printing was to absorb any they cannot eat solid their, food dissolved in water. That is why they absorb so much more liquid than they really need, and that, too, is why their leaves are a sign to us that other changes, of which we see nothing, have been taking place in the immost tissues of the tree. One of the said. A few minutes later she said good night and the room was quiet.

It seemed to Penelope she had been asleep but a few minutes when Virginia was urging her to hurry and the room was quiet.

The Work of the Leafe was now so of the tree to absorb anything. Its squile unable to absorb anything. Its squile unable to absorb anything. Its squile unable to absorb anything. It is quile unable to absorb

good things, too. We all feel that you will get on famously here."

longer."
Miss Andrews looked at her

keenly. "I wonder, Penelope, if you have had time to think about our

Current Events

The "Hidden Statue" of Lincoln ID you see in the Monitor early in the week a picture of the fine bronze statue of Abraham Lincoln which is soon to be unveiled in Grant Park, Chicago? This statue is not new. It was finished 20 years ago. But be-cause the site chosen for it was not ready, it has had a long wait, hidden away in a common shed. So long has the wait been, that Chicago for the most part forgot that it had such

Augustus Saint-Gaudens was the sculptor of this noble memorial to the Great Emancipator. He labored at it for 12 years, but it was a labor of love, and he hoped that it would be the crowning creative work of his In this statue Lincoln is seated.

The bronze, raised on a pedestal of pink granite, is at the center of a stone platform approached by mar-ble steps. Saint-Gaudens intended to express the loneliness of Lincoln during the crucial period of the Civil War, and there is a sense of isolation as well as dignity and thoughtfulness about the still figure.

The donor of the memorial was John Ererar of Chicago. He loved the city, and worked constantly to make it finer and more beautiful, and to improve living conditions there. Among other bequests he left \$100,-000 "for the erection and maintenance in perpetuity of a statue of Abraham Lincoln."

to clear up a point which the American public does not seem to under-

The Cloture Rule

In last week's Current Events mention was made of the cloture rule which supporters of the World Court intended to invoke if necessary. This been only about 32 or 33 cents. rule is now in force in the Senate, and you may be interested to hear a few

The rule is one to limit debate on a measure before the Senate in order that voting may take place. It was adopted in 1917 after an example of filibustering which drew from President Wilson the rebuke that "a little group of willful men, representing no opinion but their own, have rendered the great Government of the United States helpless and contemptible." The rule provides that on the petition of 16 senators, approved without debate by a two-thirds vote, discussion on a measure before the Senate shall come to an end after each member has enjoyed the right to speak for not more than one hour.

As a result of the application of the eloture rule the World Court resolution was pressed to a vote, and carried by 76 ayes to 17 noes.

The Rubber Question

You may have heard that there it is this, and the fact that the restriction in output affects the United States more than other countries that has produced this feeling. Here is what Sir Esme Howard, the British Ambassador, has to say about it.

Speaking from first-hand experi-

cents; six or more, each 37 cents.

ence of rubber planting, he pointed out that the price of rubber had soared to \$2 a pound at the end of last century. Since then successful planting in Ceylon and the Malay Peninsula had sent prices steadily tumbling, until the Great War revived them again for the time being.

"Prices, however, dropped again after the war," continued Sir Esmé, "to a point at which it was no longer profitable to work certain of the plantations and unless something could be done to save many of them they would have had to be abandoned and would have gone out of cultivation. This would have caused prices to rise again automatically by naturally restricting the output and doing so in such a way that it would have been impossible to meet at once an immediate and urgent demand, while at the same time ruining a number of people who had invested their money in planting.

"The Governments of Malaya and Ceylon then took the matter up and, after having failed to induce the estate owners to get together and agree upon voluntary restriction, passed a law which limited the exportation of crude rubber, in such a way, however, that the shipments of rubber should be increased as prices

"Further, I should like to say this stand. Although prices for crude rubber touched exceedingly high levels for a few months last year, the average price for the whole year was only about 73 cents a pound and the average for the last five years has

Study Projects for Monitor Readers

Paris circles are discussing the feasibility of instituting a common currency for all Europe. To what degree is this now practicable, and what results would be likely to ensue if the movement were successful?

Would a common European currency tend to stabilize national coinages and stimulate international business, or would the new money acquire a special value in each country, and thereby increase commercial confusion?

Would the success of such a currency necessarily involve its

acceptance as a new standard of exchange, superseding the dollar and the pound, or would it act as an auxiliary?

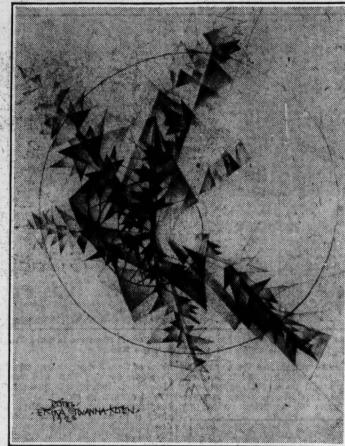

(See Monitor of Nov. 4, Jan. 4, 19.) Will the great power scheme which the British Gov-

ernment is contemplating provide cheap electricity for industrial, agricultural and domestic uses? How?

To what extent has Canada benefited by the development of electric power? Can similar methods be applied in England as are employed at Niagara Falls?

If it is intended to utilize coal for the development of electricity, why is there objection on the part of miners in England to the Government's scheme? Is Henry Ford's proposal to turn the coal into electricity in the mine, rather than bring it first to the surface before putting it through the necessary process practicable? (See Monitor of Dec. 5, Jan. 15, 16, 18.)

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are put regularly in the above form on the Thursday Educational Page. The purpose of these questions is: To assist in a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in secondary schools and colleges; frequently one for the upper elementary schools.

Rhythmic Study From Pine, by Erica J. Kiein, Vienna. An Example of Prof. Cizek's Teaching Method.

Professor Cizek's Method in Arts and Crafts

Vienna, Austria Special Correspondence A teacher of art to children, Professor Franz Cizek enjoys a has done for his students at the Arts and Crafts School, Vienna, remains to be told. His gifts as an art teacher were already recognized when he was quite young. For this reason he was intrusted, when the reform in the teaching of drawing began in the Austrian schools, with the turning of the professors in the different art industrial schools throughout the monarchy from their old methods of instruction by means of drawing from the cast and flat to the study of nature, thus bringing about a revolution in industrial design. He had some time previously been appointed teacher of design at the Central Arts and Crafts School in Vienna. For the Government, though unconvinced but wise in its generation, gave him an unfettered hand to do as he liked, just to see how the thing would turn out. Persuaded by the results achieved, he has been allowed to go on without let or hindrance ever since. That was more than a quarter of a century ago.

True pedagogue as he is, Professor Cizek's thoughts and actions are always widening into new spheres. He sees possibilities to which the ordinary teacher seems blind, or at least does not find practicable. He carries along his students to undiscovered lands, and by his methods leads them to put their own thoughts into definite form. So he has abandoned his class of design and study

ments and community centers

of nature. In its place, however, he has opened one for the rhythmic study of art. For, he says, "rhythm is the true essence of art." This is everywhere present, in the build-up of the picture, in the build-up of plastic art, in the build-up of space. That is to say, in painting, sculpture and architecture.

Ever since the days of the Empress Maria Theresa, 150 years ago, this has been almost an unbroken tradition. For even in those remote days it was recognized in Austria, that of the place of the material and technique into which design is to be translated. Of those and architecture.

Results Depend on Rhythm All three depend for their artistic results, on rhythm. But only the watchful eye can perceive this rhythm. It is not perceptible to all. Sensitive minds, rightly controlled, express it in color which is the build-up of painting, in form, which is the build-up of plastic art, and in architecture, which is the build-up of space. This forms the basis of Professor Cizek's teachings, or better said, "guidings." For he lays

down no laws, but leads his students each develops on different lines rhythm being the starting point. In this way new material is gathered, which discussed freely in class, leads to further discoveries.

The beginnings each year are highly interesting. The first aim of the professor is to preserve the in-Therefore he searches for that knowledge of them only revealed by careful watching to the open mind. This he can only gain slowly, in the course of time. The starting point is to leave them to themselves, to let them create something which at least will give him some definite clue as to their powers. When he has come to a conclusion he proceeds to develop naturally, but always it is through their self-experienced sensations for rhythm, thus breaking through all conventions.

design is to be translated. Of those

studying under Professor Cizek, whose work is here reproduced,

Fräulein Erica J. Klein had previously attended a school of dramatic

art, and W. Domenig the "Fach-schule" for wood industry at Hallein.

The School as Conducted

The number attending the class is

estricted to 40. The normal course

is a year, but students if they wish may stay on a second or even a third

year. This is of a twofold advantage,

to the teacher and to the taught, for

Professor Cizek, in this, has struck a new path for art-teaching. His methods are already finding followers. Those who pass through his class become designers, architects, painters, sculptors, toy-makers, pot-tery-makers. Many now have workshops of their own known for the beautiful objects made in them. Whatever these may be, they have one thing in common, characteristic to all, the rhythm expressed in their work, shown in its structural build, as in the craftsmanship into which the design has been executed. In this way Professor Cizek has dembut rhythm is the basis of arts, fine or applied. Interesting developments

These are but straws showing how

the breeze is blowing in the busi-

The classics are better taught than

they were 15 or even 10 years ago.

The teacher of the last generation taught Greek and Latin philology

and syntax. The teacher of today teaches classics—that is, Greek and

Latin literature, history and art. The

old clasical teachers were made in

Germany. The German discipline was good for great minds like Gil-dersleeve and Goodwin, but it too

often left lesser men with the idea

that Cæsar wrote his history of the

Gaulic War to exercise the ablative absolute. High school pupils who studied under such teachers found nothing in Greek more exciting than

the pursuit of the fugitive digamma, "I caught one of the blighters—I

think it was Sophocles—the other day using the subjunctive without

the right conjunction." That's about what the last generation got out of

ness world.

schools.

In the junior high schools, for example, instruction is offered in four basic trades—metal, building, cabibasic trades—metal, building, cabinet and graphic. In his work with the junior high school practical arts these the pupil has the opportunity to make more than a score different contacts, and there are laid before work has been developed, its major him lines of work that lead into between 400 and 500 branches of "The plan is that the gir trade activity. Music News and Reviews

Szigeti Soloist With

Cincinnati Orchestra CINCINNATI, O., Jan. 22 (Special Corres ondence)-After an interval of nearly a month the Cincinnati Symphony Orchestra has resumed its regular series of concerts in Emery Auditorium. The Friday afternoon concert this week was an occasion of welcome after the orchestra's tour of the east. When Mr. Reiner came on the stage, orchestra and audience rose to greet him and a wreath was presented to him by the members of the band.

The program included the Vorspiel to "Die Meistersinger," Edward Bal-lantine's "From the Garden of Hellas." Brahms' Violin Concerto, played Josef Szigeti, and Stravinsky's suite from "The Fire-Bird."

Mr. Ballantine's music was heard for the first time in Cincinnati. It impressed one as being an interesting series of tone poems, notable the land upon which this village is chiefly for the composer's talent for to be built is a part of an English rected at Mr. Weddell softened and did full justice to the score, and the new colony. work of the orchestra was excellent.

over-rennement. It was done too much in the same manner which of Sulgrave Manor, they did not conwas used so successfully a short time ago in presenting "The Afternoon of a Faun" and Ravel's "Daphnoon of a Faun" and Ravel's "Daphnis and Chloë," Suite No. 2. In itself it was a beautiful reading, but it lacked the grotesque and barbaric coloring with which Stravinsky himself invested it when he conducted

its performance here last year.
Szigeti, by his playing, proclaimed himself a fine musician, a splendid technician and a discriminating artist. The first two movements of the concerto he played extremely well, as indeed he did the final one also, but here a breadth and depth of style was demanded which is apparently foreign to his temperamen tal equipment.

The "Meistersinger" Vorspiel was

excellently done. For the next three concerts Mr Reiner will give over the baton to Dohnányi, Respighi and Chalmers

Adolf Tandler Conducts Los Angeles Concerts

LOS ANGELES, Jan. 16 (Staff Correspondence)—The seventh pair of concerts by the Los Angeles Phil-harmonic Orchestra was given yesterday afternoon and this evening, with Adolf Tandler as guest conductor. The program:

Franck.....Symphony in D minor Dohnanyi.....Suite for Orchestra Goldmark Overture "From the Days of Youth"

Overture "From the Days of Youth"
Mr. Tandler's interpretation of the
Franck symblony showed an earnest
study of the score, but appeared to
lose somewhat in unity through overemphasis of detail. The Dohnanyi
suite, heard for the first time at
these concerts, was both well played
and well received. Interest does not
for a moment lag during a hearing
of this work, each of its four movements differing radically from the ments differing radically from the others in apparent portrayal of the changing moods of the composer. In its rendition, as well as in that of the symphony, the woodwinds executed their important part with vigor and distinction, lending much color to the fascinating and imaginative structure of the suite. In this con-nection, the English horn should

receive especial commendaton.
Goldmark's overture, "From the Days of Youth," another newcomer to these concerts, also had a good with their architect, Henry G. is the stone roof. This was taken Morse of New York, seeking ideas down carefully so as not to disturb and architectural levels of the Sulinterpretation and enthusiastic re-ception, though it is to be hoped that Los Angeles will have the opgrave Manor period, that they learned that Warwick Priory, built portunity of a second hearing in order better to appreciate its com-

Mr. Tandler won an ovation from Mr. Tandler won an ovation from the Friday afternoon audience, and it was obvious that he had their com-plete sympathy throughout the pro-gram. Both as conductor of the now disbanded Los Angeles Symphony Orchestra and as present leader of the Little Symphony here, he has made a place for himself in the affec-tion of music lovers in this city. Diffection of this concert was given him as a gesture of recognition of him as a gesture of recognition of his large part in musical progress here, and that portion of Los Angeles which attended made it very plain it approved the honor.

third the purchase fell to a local builder who hoped to realize on his investment from the sale of building stone. It was from this builder that Mr. and Mrs. Weddell pur-chased what remained of the priory.

The mansion had had nearly 100 rooms, and was almost a castle. Mr. Weddell made arrangements for the removal of 2500 tons of material by boat to Virginia. Immediately there arose in the press and near-by communities a voice of criticism against "the continued removal of England's treasures to America by rich men to gratify a passing caprice." Last July it had been proposed to Parlianent that Warwick Priory be purchased as a historic monument but the Government found it inadvisable to comply. Then an effort was made The Sun Dial Over the Main Entrance in the town council to purchase the Reads: "I Mark the Moments Trod building but nothing came of it. Then came the three sales.

prices made further recovery in to-day's market, which was featured by a resumption of pool operations in a number of food, chemical, farm im-plement, copper, and public utility is-

Easy money rates continued to provide the groundwork for the advance. The ready absorption of the offerings of short traders helped to revive waning bullish enthusiasm.

Sugars and oils gathered strength on reports of stiffening commodity prices, while a revival of merger, and recapitalization rumors, infused new strength into a number of specialties.

Advance Rumely preferred was hid

Advance Rumely preferred was bid up 7½ points above last night's final quotation, National Biscuit, Kelsey Wheel, and Third Avenue Railway, all sold more than 4 points higher, and scores of others showed net gains of 1 to 2 points.

scores of others showed net gains of 1 to 3 points.

Ralls were rather slow in responding to the publication of unusually favorable preliminary 1925 earnings reports of some of the larger systems.

The Southern Railway shows about \$16.17 earned on the common last year as compared with \$12.30 in 1924, and the Baltimore & Ohio road shows about \$12.01 in 1925 as compared with \$9.19 the year before.

the year before.
Foreign exchanges were shaded at the opening with demand sterling quoted at \$4.85%.
Buying demonstrations in New York

Buying demonstrations in New York traction, sugar and semispeculative railroad issues featured today's early bond trading, which maintained a strong tone.

Although the market was forced again to compete with a large volume of new financing, a large part of the investment demand was supplied on the stock exchange. Chesapeake & Ohio convertible 5s led the advance in the railroad division in which Baltimore & Ohio, Frisco and Chicago & Western Indiana issues joined.

Western Indiana issues joined. Most of the New York City transit Most of the New York City transit bonds enjoyed a revival of public buying interest, but the liveliest bidding took place for Third Avenue Railway adjustment 5s, which spurted up almost five points to a new high price for the year.

International Mercantile Marine 6s also reached a new peak. The recent improvement in sugar market conditions was reflected in the upward movement of Eastern Cuba, Punta Alegre and Cuban Dominican obligations.

GRAIN PRICES HAVE

CHICAGO, Jan. 28 (49)—Despite a downturn at the opening today, wheat values quickly scored an advance.

Aggressive buying on the part of houses with eastern connections was largely responsible for the strength which developed to a considerable extent, the fresh buying movement appeared to be based on trade estimates pointing to a possible deficit of 53,000,000 bushels in world supplies of wheat at the beginning of the new crop year, and to likelihood of great exhaustion of stocks in all countries.

and to likelihood of great exhaustion of stocks in all countries.

The opening, ½ to 1 cent lower, May, new, \$1.72% @1.73, and July \$1.49%@1.49½, was followed by a rise to well above yesterday's finish.

Corn and oats were firm, sympathizing with wheat. After opening unchanged to ½c up, May 84%@84%. corn reacted a trifle, and then made material gains.

Oats started unchanged to ½c off, May 44%@44½c, sagged somewhat further and later showed a slight advance all around.

vance all around.

Provisions were weak, influenced by lower quotations on hogs.

JAPAN USING MORE

Japan used more American cotton in December than in any previous month in the history of the Japanese cotton spinning industry, according to the cotton information service of the Merchants National Bank of Boston.

Japanese spinners did not consume quite as much foreign cotton in December as in some other months, but their consumption of foreign growths was almost at maximum. Their total consumption of all cotton was at a new high.

Of American cotton, Japan consumed \$8,000 bales in December, compared with \$5,000 in November and \$8,000 in December last season. In the five months from Aug. 1 to Dec. 31, Japan consumed 383,000 bales this season compared with 247,000 in the corresponding period last season.

Of foreign cotton, Japan consumed 132,000 equivalent 500-pound bales in December compared with the same amount in November and 137,000 in December last season. In the five months from Aug. 1 to Dec. 31, Japan consumed 649,000 bales of foreign cotton this season compared with 623,000 in the corresponding period last season.

BOSTON STOCKS INVESTMENT DEMAND FOR BONDS HEAVY

Despite New Offerings, Bond Price Average Rising-Easy Money Outlook

NEW YORK, Jan. 28—In the face of continued heavy flotation of bonds amounting to practically \$100,000,000 last week, compared with \$148,000,000 in the preceding week, the bond market reached new high ground.

At 93.89 Saturday the Dow-Jones average of the price of 40 bonds stood at the highest point in nine years.

Allowing for the factor of federal income taxes, the investor is now buying bonds on substantially the same basis as before the United States entered the war.

basis as before the United States entered the war.

Advance in prices in the last week was general all along the line. In all groups of listed bonds advances outnumbered declines three or more to one during the week's trading. The uncertain character of trading in stocks had its reflection in erratic movements in some of the more speculative bond issues, but high-grade investment bonds were uniformly firm.

firm.

Such sound investment issues as Argentine 6s in the foreign group, New York, Chicago & St. Louis refunding 5½s among the rails, United States Rubber refunding 5s among the industrials and Western Union 6½s in the utility field all advanced a point or more. r more. The action of some of the former

The action of some of the former speculative favorites which are gradually attaining investment rating was also noteworthy. Hudson & Manhattan income 5s, for example, were selling in the 20s only five years ago. The steady advance in the road's earnings, in the last seven years has resulted in an increasing margin of safety for the full interest payment on the bonds, however.

It has further enabled the road to inaugurate dividends first on its small preferred stock issue and then on its large common stock issue. The increasing claim of this issue to investment rating is being recognized by the market, and last week the bond made a new record high.

made a new record high.

Brooklyn-Manhattan Transit secured 6s and Frisco adjustment 6s are other bonds of this same type which were speculative favorites a few years ago, and are now rapidly in-creasing their appeal to the investor. Following the turn of the year, money flowed back into the banks with unexpected rapidity, and rates at once softened. The present-tone of the mency market is so easy that many bankers expect to see prime commer-cial paper ruling at 4 per cent shortly, compared with the 4½ per cent quo-tation which has prevailed for many

months.

If money is so easy at a time of exceptional business prosperity, it is somewhat difficult to visualize a stiffening of money rates such as might be expected to depress the bond mar-

Dealers in bonds are thus optimistic regarding the course of quotations. So conservative a house as C. F. Childs & Co., specialists in Government bonds. goes so far as to say in its current market letter that "purchases of Gov-ernment securities can probably be made now at the lowest price levels to be quoted throughout the year." In the circumstances it naturally happened that last week's new offerings were enthusiastically received by

DIVIDENDS

Columbia Gas & Electric declared the regular quarterly dividends of 65 cents on the common and \$1.75 on the A preferred, both payable Feb. 15 to stock of record Feb. 4.

Lima Locomotive Company declared the regular quarterly dividend of \$1 on the common, payable March 1 to stock of record Feb. 18.

International Agricultural Chemical declared a regular quarterly dividend of 1% per cent on the prior preference

THE CHRISTIAN SCIENCE MONTRON, BOSTON, THURSDAY, JANUABY 28 1926.

FOREIGN TRADE OF CANADA HAS BIG INCREASE

In 9 Months Gains Almost \$300,000,000—Wheat and Paper Big Factors

OTTAWA, Jan. 28 (Special)—Substantial progress in Canada's foreign trade is noted in Government statistics covering the first nine months of the fiscal year ended Dec. 31.

The total Canadian trade for that period is given as \$1,726,000,000, being an increase of \$296,000,000 over the corresponding nine months of the

the corresponding nine months of the previous fiscal year.

Imports have risen from \$592,489,-052 to \$665,823,863, an increase of \$93,-000,000, while exports have risen from \$222,778,414 to \$1,030,697,915, a gain of

\$828,778,414 to \$1.030,697,915, a gain of more than \$200,000,000.

Fully half of this increase is attributable to the great advance shown in the output of agricultural products during the last calendar year, the external sales of domestic farm products (foodstuffs) in the nine months' period having increased from \$323.

sign of this increase is at ributable to the great advance shown the third of this increase is at ributable to the great advance shown the third of this increase is at ributable to the great advance shown the third of third of the third of

hydroelectrice development in the Ot-tawa district, promise a considerable tonnage of iron and steel business, while it is reported the Canada Cement Company considers prospects sufficiently bright to justify the open-

Mining Operations Expand

Expansion in the northern mining fields, notably at Hollinger where orders are being placed for three additional rod mills, and where considerable tank construction is now under way, is bringing much business to the metal plants

metal plants.

A recent statement shows that commercial failures in the Dominion for the year just closed numbered 2371, with liabilities of \$43,767,825, these figures contrasting with 2474 defaults in 1924, with liabilities of \$64,530,975. The decrease in number this year is almost entirely in the province of Ontario, where there were 625 failures as compared with 817 in 1924.

Canadian bank clearings for the week ended Jan. 21 were higher in most cities than those of the corresponding period of last year. Montreal clearings showed an increase of \$6,525,353 at \$96,896,994. Toronto clearings were the highest in the Dominion at \$97,115,628, and were up \$4,708,784 over last year. Winnipeg clearings showed a gain of \$6,000,000 at \$45,811,308.

CUSTOMS RULINGS

NEW YORK, Jan. 28 (Special)—Sustaining a protest of the International Jobbing & Export Company, the Board of United States General Appraisers rules that imported secondhand cotton tents, assessed under paragraph 921, Tariff Act of 1922, as manufacturers of cotton not specially provided for, at 40 per cent ad valorem, should have been taxed at only 10 per cent under paragraph 1457, as waste not specially provided for.

Granting relief to the Washburn-Crosby Company, Buffalo, the board finds that certain wheat mixed with screenings, imported from Canada, was incorrectly taxed at 30 cents a bushel as wheat under paragraph 729, Act of 1922. Judge Waite rules that 97.3 per cent of the importation was properly taxed as wheat, but that 2.7 per cent should have been assessed at 10 per cent under paragraph 731, as screenings.

YOUNGSTOWN TUBE EARNINGS YOUNGSTOWN, O., Jan. 28 (#)—Net earnings of Youngstown Sheet & Tube Company on its common stock were more than \$12,000,000 for 1925, James A. Campbell, president of the company, said yesterday, after a directors meeting. After paying about \$4,000,000 in dividends the surplus amounted to about \$8,000,000, Mr. Campbell said.

"KATY" EARNINGS GAIN Missouri-Kansas-Texas Lines preliminary statement for the year ended Dec. 31, 1925; shows surplus of \$6,117,618 after taxes and charges, including adjustment bond interest. After deducting estimated dividends on 7 per cent preferred, balance is equal to \$5.41 a share on \$06,755 no-par common shares, compared

\$15,000,000 BAILROAD FOR ONTARIO TORONTO, Jsn. 28—Spruce Falls Pulp Paper Company, holder of large land areas of Ontario Government, has let contracts for the construction of a 69-mile railway from Kapuskasing to Smoky Falls, at a cost of around \$15,000,000. The railway must be in operation by the end of 1928.

ACTIVE STEEL COMPETITION

Pittsburgh Makers Reach for Business in the Chicago District

CHICAGO, Jan. 28 (Special)-Pittsburgh district makers of heavy finished steel are reaching out more finished steel are reaching out more aggressively for business in Chicago territory. They have not taken any tonnages or compelled shading of prices, but they have made 2.10 cent, Chicago, for bars, plates and shapes less firm, and eliminated hopes of some Chicago producers for a second quarter advance.

Bookings of heavy steel top shipments by a small margin, and basically the iron and steel situation is firmly grounded, but the usual January

grounded, but the usual January softening in sentiment and prices has

softening in sentiment and prices has made its appearance.

Competition for tie plate business at St. Louis has reduced the market \$2 a ton, to \$45. Cast iron pipe a week ago fell from flat \$42 a ton, Birmingham, to \$40 to \$42, and now the top is \$41.50.

Sheet prices have not been affected, but specifications have been slow com-

Sheet prices have not been affected, but specifications have been slow coming in. Wire and nail prices have disappointed those makers looking for increasing firmness.

Iron and steel scrap prices have declined, and steel scrap is being traded in at \$14.75. If iron ore prices are reduced, as now talked et, melters will seek cheaper pig iron.

One maker has booked 8000 tons of tie plates and 2000 tons of angle bars,

tie plates and 2000 tons of angle bars. indicating unusual activity. Railroad specifications against 1926 rail con-tracts are heavy. The leading interest has booked 23,000 tons of car steel. Structural steel awards continue sea-

sonal large.

Bolt and nut specifications are improving, and makers are asking higher prices for small quantities. Inland Steel Company has bought 15,000 tons of basic iron because of a shortage of this material from its own furnaces. A number of foundries are rounding out their first quarter iron purchases with lots of 150 to 200 tons. The Gary works of the Illinois Steel Company is operating full, with the ingot average for the Chicago district still 88 per cent.

ALLIED PACKER'S YEAR ALLIED PACKER'S YEAR
Gross sales of Allied Packers, Inc., increased by \$12,000,000 to \$85,000,000, but a net loss of \$290,660 was suffered, as recorded in the annual report for the year ended Oct. 31. Assets total \$31,148,000. Current assets totaled \$11,374,000, against current liabilities of \$5,484,000. The company's manufacturing and merchandising improved substantially in 1925, according to J. A. Hawkinson, president.

MULLINS BODY CORPORATION Mullins Body Corporation reports net profit of \$283,610 after all charges for 12 months to Dec. 31, 1925, compared with \$299,715 in the previous year. Net profit for 1925 after preferred dividends was equal to \$2,03 a share on 100,000 shares of no-par common, compared with \$2.22 a share in 1924.

In the Ship Lanes

THE intercoastal situation was ad-JHE intercoastal situation was adjusted at a final meeting of the lines composing the conference in BUSH, Apt. 11-B. 205 West 57th. New York, and the three companies which had resigned withdrew their resignations. The agreement reached was effected largely by the United States Shipping Board, T. V. O'Connor, chairman, having attended a previous meeting of the conference. As a result, it is believed that an effort now will be made to bring the nonconference

e made to bring the nonconference ines into the association. Changes made at the suggestion of the Shipping Board included the op-tion of withdrawal from the confer-ence on 15-day rather than 60-day notice. Rates on westbound commodities will be maintained by all members. Changes in rates will be made by a committee representing three lines, which will report to the full conference before any actual changes.

Canadian Export Grain

Reports concerning the diversion of grain from Canadian ports to Balti more for export by the Canadian Na-tional Railways have been checked up. J. K. Smith, transportation manager of the Montreal Board of Trade, miniemphasized in the United States recently.
"We do not consider that the Cana-

dian Nationals have taken any action recently to divert their export grain to the port of Baltimore," he said. "For a great many years they have carried rates to Baltimore for export, most of which apply via Buffalo and various connections beyond.

"The Western Maryland Railway was not included among these lines, and, as we understand the matter, they

and, as we understand the matter, they recently requested that they be given an opportunity to join in the handling of some of this grain to Baltimore for export. I have not checked up the routing to ascertain definitely the exrouting to ascertain definitely the extent to which they are now able to participate, but I presume they would get the haul from York, Pa., or somewhere in that vicinity, to Baltimore."

From this, it is apparent that the matter was largely that of establishing a through rate by the Western Maryland, similar rates by other lines already having been in existence. The fact that a rate is in effect does not necessarily cause traffic to follow the routes establishing such through rates.

Vancouver Developing
The remarkable development of Vancouver, Canada's leading port on the Pacific makes it a formidable rival rot only of United States Pacific coast parts but of the Dominion's eastern outlets as well. There are now 40 steamship lines operating out of Vancouver compared with 21 in 1920. Vessels arriving in 1925 fotaled 19.666, registering 10.027.000 or approximately

couver compared with 21 in 1920. Vessels arriving in 1925 fotaled 19,666, registering 10,027,000 or approximately double the record of 1920.

Average monthly sailings included 18 to Australasia, 16 to the United Kingdom and Europe, 15 to the Orient and the remainder to the United States and South America. Imports for the fiscal year 1925 were \$53,000,000 and exports \$105,000,000. Foreign cargo was 2,958,000 tons in and out in 1925, including 33,000,000 bushels of grain, together with heavy shipments of flour, apples, canned salmon and lumber.

Wheat shipments, due to an embargo, dropped considerably from the 1924 figure of 55,000,000 bushels. The capacity of the port, with the huge pier of the Canadian Pacific Railway nearing completion, is from 70,000,000 to 100,000,000 bushels a year. Prior to 1921, no commercial grain moved through the port.

The grain through Vancouver goes both to Europe and to the Orient in the proportion of two to one, respectively. Rail trackage totals 27% miles on piers and in yards and the port also posses a floating drydock 556 feet in length.

Cruises from New York Crules, from New York
On one day last week, four special cruises left New York, including the Resolute (United American) around the world; President Monroe (Dollar), world service; Ohio (R. M. S. P.) Mediterranean, and Republic (U. S. Lines). Mediterranean. On the next day two other cruises departed including another world cruiser, the Laconia of the Cunard Line, under chapter to Frank G. Clark Tours.

guidance of Howard E. Greene and the management of the O'Donnell-Murray ence before any actual change is made by any line. Third Cabin From Boston

Commencing in May, the steamships Winifredian and Devonian of the Ley-land Line's Boston-Liverpool service, will be converted into tourist third-cabin ships only. As tourist thirdcabin steamers, they will have increased stateroom accommodations but will undergo no radical changes in equipment. Formerly, the two ships were engaged in the cabin class traf fic. The Leyland Line, a subsidiary of the International Mercantile Marine, is one of the oldest transatlantic lines so one of the oldest transatlantic lines. No port in war times was ever more completely blockaded than is Miami at present, due to the capsizing of a craft which was to be used as a floating cabaret in the main ship channel. The ship in question, the Prinz Vlademar, a barkentine, turned turtle at a point which prevents about the which prevents about the defended of the prinz which prevents about the prinz which the prinz which the prinz which t point which prevents ships which had

unloaded their cargoes from leaving port, and also blocks the channel for incoming ships loaded with supplies which the railroads have been to carry. More than 100 ships were reported at anchor awaiting the clear ing of the channel. The accident to the hotel-cabaret has tied up legiti-mate business, principally building, for weeks, due to lack of supplies reaching port currently. Liner Movements From New York Saturday, Jan. 30

EDITORIALS

Again Mr. Buckner, United States Attorney for the southern district of New York, returns

Adapting the Courts to an Emergency

to his assertion, originally made immediately following his appointment, that the federal courts as at present constituted, especially in those jurisdictions in which the states do not co-operate in the en-

forcement of the prohibition statute, are unable to try and dispose of the cases brought before them. As a result, he told an audience made up of ministers in the churches of his city, the dry law is not being enforced. The federal prosecutor has long contended that where it is attempted to compel reasonable obedience to the law by prosecutions in the federal courts alone, some shorter and more expeditious method of procedure than that prescribed must

be authorized by Congress.

But it is Mr. Buckner who has proved the effectiveness of the padlock method, quickly and cheaply applied by these same courts, in abating nuisances which had long existed in the thinly disguised "clubs," cafes, and rum shops in the neighborhood of Broadway. He has lately been assured of the co-operation of the metropolitan police in his determined effort to enforce the law by this direct method. It is true, as he insists, that without courts to try accused persons those who are known to be guilty cannot be sent to prison. But as to the necessity of revising the procedure of the federal courts simply to expedite or even to make more certain the enforcement of the laws in those states which have chosen to refuse to exercise concurrent authority in this respect, there may be reasonable doubt. New York, much to the disappointment of all friends of enforcement, has seen fit to erase from her statutes the law which had been passed in support of the constitutional amendment. In most of the states, however, there is a quite general tendency toward co-operation between federal and local officials. While it cannot be claimed that even under this co-ordinated method complete enforcement of the law has been effected, it is undoubtedly a fact that outside of New York there has been a much closer approach to enforcement than in the State or city.

It is not surprising that conscientious officials who find themselves unable to compel complete or even reasonable observance of the law within their jurisdictions become restive and impatient. But they should not lose sight of the important fact that every failure of the law, where the law has been flagrantly violated, instead of creating public sentiment against absolute enforcement, is actually arousing an indignant and powerful public to the point where the complete vindication of the law will be demanded and compelled.

The American people have never sat passively under any continued denial or abuse of a recognized national or common right. They have been slow to act, it may be, but they have never failed to assert themselves finally and determinedly. The overriding of the law now, especially in those localities where enforcement is most lax, is but a manifestation of a defiant decadent system which is struggling in the throes of dissolution. To the mob, gloating in the spectacle, the extremity may not be apparent. But by its very defiance of all that the conscientious people of a great democracy hold sacred this particular monster is conspiring with all its defenders in writing its own sentence of destruction.

Oftentimes the war motive can best be clarified by a simple statement of the economic

What the Riff War Is About

stakes at issue, and a case in point is the campaign in the Riff mountains of northwestern Africa which is now scheduled to be renewed in April, when the rainy season is over. From one point of view the

struggle has been represented as that of a small and brave mountain people for political inde-pendence, as against domination by militaristic world powers which have arrogated to themselves the right to rule over territories outside their own borders. From another it has been pictured as the old combat between civilization and barbarism.

But like most primitive peoples who have to defend themselves against the forces of "civilized" nations, whether in Africa, Asia or the West Indies, the Riffians live in a country that has been endowed with rich natural resources, and in the negotiations for peace that have been going on since the weather put an end to the warfare last fall there has run like a red thread reservations and special stipulations about the mining rights along the Wergha (French Ouergha) River. The French have demanded that, though local autonomy might be granted to Abd-el-Krim, these mineral concessions must be retained by the Sultan of Morocco, which in effect means by his French "protectors." Conversely, the Riffian chieftain, who has had the training of a mining engineer, has been equally persistent in keeping those rights for himself, presumably for the ultimate purpose of ceding them to some other foreign interests. On all other points compromise has seemed possible, so that if the warfare is resumed in the spring it will clearly be over the rights to exploit the mineral deposits of the country.

This is but a repetition of former troubles in Morocco. The mining question was one of the points debated at the Algeciras Conference twenty years ago, and in the treaty that followed certain concessions were recognized as belonging to German firms. In the Versailles Treaty, however, Germany was forced to renounce these rights even in the territory which was then regarded as under the rule of Spain, a neutral country and in no wise a party to the Versailles Pact. The Paris correspondent of the Manchester Guardian asks pointedly what is the exact status of those concessions as be-tween Germany and Spain. France, of course,

does not recognize them. Direct reference to the mining rights was

his recent address before the Chamber of Deputies in which he announced that the policy of his Government would be to refuse to negotiate with Abd-el-Krim or his emissary, the British captain, Gordon Canning, who on Oct. 29 was authorized by Paul Painlevé, who was then Premier, to visit the Riff chieftain with a view to a peace parley. Since that time the French parliamentary center of gravity has shifted toward the Conservative side, and it is fairly evident that in return for business support M. Briand has had to promise to pursue the war. On this point the Spanish and the French governments now seem to be in agreement. But who are the backers of Abd-el-Krim and what are they going to do?

Though technically involving only 80 cents, the case now pending in the United States Court for the District of Minnesota, between the Federal Government and the Northern Pacific Railway Company, is likely to prove a long legal battle. For according to the decision rendered millions of dollars will be turned in one direction or another. The railroad company sent the Treasury Department a bill for \$33.09 covering the transportation charges of a marine sergeant from St. Paul, Minn., to Seattle, Wash., and the General Accounting Office in Washington held that it should have been only \$32.29.. The contention of the railway is that the sergeant was transported by the shortest and quickest route; the contention of the Government is that the charge should have been made on the basis of land-grant mileage, which might have been used in lieu of two cutoffs that shortened the distance traveled, and transportation over which is free to the Government. Thus, as O. R. McGuire, one of the Government's representatives in the courts, has put it, the question involved is really how far the Government may continue to get returns from the grants of land made in the nature of subsidies to the building of most of the large railroads of the West.

The teaching profession has a stirring appeal for young men who seek a vocation requiring

A Man's

Job

their utmost talent and courage. But, for that

appeal, until recently at least, there has been no intelligently devised "sending station" and no intelligently tuned "receiving sets." The teaching profession has

been crying for men. The cry has been getting louder and more determined. It is quite obvious also that this cry is not going to be quelled, or even checked, except by a convincing tread of great numbers of men into the teaching ranks. But, so far, there has been "no language but a cry." The need is to see that the "stirring" is permitted to stir.

Now, the comparatively few men remaining in the schools of Ohio have formed a schoolmasters' club, the chief object of which, according to its president, is to attract men to the teaching field. They have declared it as their "imperative duty to call the attention of the public to a condition facing the public schools which seems prejudicial to the best interests of the boys and girls." Furthermore, "the organization views with alarm the rapid disappearance of men from the schools. There is among men at present preparing in our colleges and normal schools for the profession of teaching such an alarming decrease as to indicate further drastic diminution. . . .

The teaching profession must have men. It should be plain that a citizenship taught altogether by women cannot be anything but a miserable failure in many of its phases, even as civilizations trained and educated almost entirely by men teachers have consequentially and conspicuously fallen. Both men and women teachers are necessary, equally, unitedly. This is a question which should need little argument. Boys and girls-the men and women of the near future-should have direct contact with masculine courage and with masculine ability to grasp a situation of world-encircling proportions, as well as with feminine conscientiousness, feminine thoroughness and feminine sympathy.

Naturally, if the young men attending college or university were aware that the teaching profession was a sure-go profession of the first rank and that no position called for men of courage and understanding superior to that of the teacher, there would be no lack of men teachers. Young men are made of that stuff which answers an honest challenge to manly qualities. There are hundreds of men upon the campuses of the upper schools who are fired by a great desire to serve humanity. They would serve it stupendously. They aspire to knowledge for its human and its spiritual values. Their sympathies are broad. They would be living examples of obedience to the laws of the land. They would put crime into positive disfavor. They would discover and make practical every means to weld the brotherhood of nations. Here is where the stirring appeal should be focused. Here let the schoolmasters' club in Ohio, and the countless other organizations which are bound to take up the cause, declare the need for real men in the teaching profession. The situation calls for some such reasonable and practical plan.

Show the young men now crowding the colleges that one out of every two teaching positions is a man's job and that man is needed mightily. Lead them to see that, as in the building of a bridge or in the undertaking of some other great engineering feat, here is a task requiring their cool judgment, their courage and their brawn. Let it become plain to them that here is a big business, the right conduct of which affords unlimited play for man's peculiar initiative. Convince the youth that it is mental and spiritual wealth that is preeminently important and that it is the biggest business of all to seek this wealth. Let the public realize that the schools must more and more graduate those who are more concerned in the production and high valuation of ideas than in the mere exchange of worldly goods.

Only a few are beginning to foresee what the changing curriculums are going to mean. The new history is going to interpret the life of man and the relation of men without prejudice. made by the French Premier, Aristide Briand, in | The new geography is going to refashion the

sharp political boundaries of the world map into a neutral color of international unity. The new mathematics is to figure the unlimited possibilities of social reason, economic justice, and righteous ideals. Even the language will be new when the mass of words signifying hatred and wickedness fall into disuse. But these things cannot be without the aid of stalwart men in the teaching profession. The need is for men who dare, and who are confident wherein they dare. Let the appeal for men be made intelligent. Let the teaching profession's cry for men be articulate.

In the thought of thousands upon thousands of aliens who have sought refuge and oppor-

Aiding

Indigent

Litigants

tunity in the United States, the word which stands as synonym for political and industrial liberty is justice. If many of these who have sought voluntary exile in a strange land have been disappointed in this

realization of the full measure of human liberty as they understand it, if their rudimentary ideals have been shattered, and if they have hesitated when urged to surrender finally their hereditary allegiance and to pledge themselves to what they have been told or have come to believe is Americanism, it perhaps is because they have failed to realize, or have been selfishly or thoughtlessly denied, that measure of industrial and social justice which should be an accompaniment of industrial, social and political

Especially in the larger cities of the United States, where alien populations abound, and where the civil and criminal courts are congested with cases to be disposed of, the defendant accused of an offense against the law, or a plaintiff seeking to have some civil right enforced, suffers a serious handicap if he is unable to employ and pay counsel. He suffers an additional handicap if by chance he is unable to understand and speak the English language. It is the duty of the court, of course, to provide counsel for indigent defendants in criminal cases. But one who has observed the application of this supposedly generous and humane rule is often compelled to believe that the ends of justice are not always conserved by the process. The indigent complainant who seeks redress for some actual or supposed wrong is in an even worse predicament. His cause is hopeless if he is obliged to depend upon his own efforts. Failing to obtain what seems to him to be the simplest justice, he is inclined to regard the entire political and social fabric of government as an institution against which he is justified in entering into secret rebellion.

In New York, as well as in some of the other large cities of the country, determined efforts are being made by members of the bar affiliated with legal defense associations to provide adequate representation in the courts for both the indigent complainant who believes himself to have a worthy cause, and the indigent defendant, formerly left to the mercy of lawyers who accept such assignments because they seldom interfere with more important business. Generous contributions have made it possible for the committee in charge of this work in New York to provide reputable counsel in such cases, thus assuring, as nearly as possible, orderly procedure and ultimate justice.

Such an undertaking is highly commendable. The illiterate or impoverished litigant, whether he be complainant or defendant, should not be permitted to remain under the prejudicial impression that justice is a commodity which must be purchased. Justice, more than theoretically, is synonymous with freedom and liberty. Unless they go hand in hand there is a failure to realize one or the other, and perhaps all. Americanism and Americanization have been held up as the ideal and the realization of a great democracy. Its champions must make apparent the fact that genuine Americanism is more than a superficial condition.

Editorial Notes

It is a remarkable tribute to The Christian Science Monitor which Sir William Barrett, F. R. S., has paid in his recently published work, "The Religion of Health. An Examination of Christian Science" (J. M. Dent). "In November, 1908, that excellent daily paper, The Christian Science Monitor, so named by Mrs. Eddy, who wrote the first editorial, came into being," he says on page 76, continuing:

No more wholesome or better conducted newspaper exists in the world, I venture to think. It shows great literary ability, and breathes the spirit of Christ, to this day keeping on a high level both from a literary and moral point of view.

The significance of this tribute is the more appreciable when the following excerpt from a review of the book in the London Sunday Times is considered:

There are, of course, many more points of disagreement than of approximate agreement, and Sir William Barrett remains to the end a hostile commentator. This being the case his testimony to the good wrought by Christian Science is invaluable, for when scientists and theologians, saints and sinners have ceased their disputa-tions, it is by their works that we are told to judge them.

Nearly a quarter of a million dollars seems quite a tidy sum for the year's expense resulting from the changing by official writers of the United States Government, including members of Congress, of their words after their writings have been set in type. Such, however, was the amount thus spent last year, as disclosed by George H. Carter, the public printer, who vouchsafed the further information that this represented some \$50,000 more than in 1924. Mr. Carter did not hold out any great hopes, moreover, to the aspirant after the honor of reading all the literature of the Government, for he gave it as his opinion the other day that such a one would have to outlive Methuselah, and that even thus he would in a few years be hopelessly behind the current publications of the vast army of government writers. But then he added that he has facilities for increasing the size of the Congressional Record from an average of 80 pages daily to 256 pages. Is it uncharitable to think of Pope's couplet:

Words are like leaves, and where they most abound, Much fruit of sense beneath is rarely found.

The Fair at Aghias Mamas

The road to the fair is no more than a wandering line worn across the country by the scrape and grind of countless hoofs and wheels. Aghias Mamas itself is a mud village in the province of Chalkidi, in Macedonia, about twelve miles to the southwest of Polygyros, the capital of the province. Always with the sea in sight, sometimes on low cliffs constitute that sometimes on low cliffs, sometimes through rows of mul-berry trees and groves of silvery olives, or away through ragged fields, in one of which, on rising ground, is a small tumulus of red earth, this road goes guilelessly, innocent of hard macadam's guiding hand.

Above a gravelly river bed is a long, flat-topped, natural mound, where once a wealthy city flourished, but whose desert sun-scorched slopes are now marked only by the telegraph line that runs across it. A mile away, close beside the road, lies a huge double-topped tumulus, around whose base are scattered hundreds of fragments of bronze

There is a ragged, low-lying village, some of the cabins with bits of ground round them, divided off by mere heaps of thorny bushes, in which the pigs and fowls rough among the dirt and rubbish, for gardens round the houses are as unknown as painted woodwork in this realm that only now awakes from centuries of violence and misery. Round a well-head, on the outskirts of the village, lie some marble columns, their sides cut with many grooves where ropes have slid for generations.

The country is bare and open, rising inland to low downs, while to the left long flats, patched and streaked with brilliant green and sandy yellow, stretch away to the sea that, in the shimmering, sunny distance seems but a band of deep and radiant blue marking the boundary between the curving earth and the purple hills across

Wagons drawn by two skinny horses or slow gray beasts, and filled with family parties, draw out of the dusty track to give us place to pass, and the peasant leading a bunch of ponies tied head to tail beside the road seems to take their plunging rushes, which almost overwhelm him, as all in his day's work, and he hardly deigns to note their terror at our passing car.

A few folk are straggling homeward; the women, now without the whirl of giddy life, carrying in their hands their high-heeled patent leather shoes, whose tyranny can only be endured if softened by the glow of

From the top of a low rise the fair suddenly appears spread out below. The sandy flats and low dusty slopes are crowded with beasts and men, their booths and vehicles. Endless groups of oxen, horses, ponies, donkeys, stand about the level ground, with people moving to and fro among them, but there is none of the bustle of lively trotting ponies, with lusty red-faced dealers' men running beside them to show their paces; no zealous barking dogs or hot and shouting drovers as at an English fair.

Here a breath of Oriental calm reigns over the bony patient animals, and men seem rather to have come for talk than trade. In the air hangs the strong, acrid scent of dust and many men and beasts herded together under

At the edge of the track three short "streets" of firmsy canvas booths have been put up on the level ground and filled with boots and shoes; goat hair saddle bags; immense black, hooded shepherds' cloaks; cheap harness; copper pots and pans; cheap glass and china; goat and cattle bells; lurid, wildly colored prints of saints and battle scenes, with lines and lines of guns and men that belch out smoke and fire in solid clouds.

In other booths, a gentleman may sit at ease and refresh himself while watching others who delight in the lyre and the dance. In one such booth a youth in tight serge breeches and heavy khaki puttees, snaps his fingers and twirls and capers vaguely round a space of turf between two great clumps of rushes, hemmed in by the narrow shaky counter on which stands a row of little dry mud stalls, that form the kitchen of this nomadic estia-

He is supported in his chaste fandango by a grizzled man in baggy, unfestive corduroy trousers and vast red cumberbund, and both dancers are cheered and spurred by the shrieks and strummings of a strident clarionet and fiddle and an immense spoon-shaped guitar.

Near by, under a scanty rag that scarcely veils the sun's fierce rays, which render hotter still his grimy, sweltering trade, upon the turf, there sits a merry, dusky youth, his feet on either side of a clay-lined hole, in which is a charcoal fire, kept hot and glowing by a pair of blacksmith's bellows worked by a small and sooty boy.

Humming to the bellows' wheezy melody, regardless

of the heat and fumes, he twists and turns over the fire a copper tray, throwing onto it a white powder which tins the copper over as he heats and rubs it with a bunch of

Costumes vary wonderfully: there is every form of sartorial diversion from the smart, tight-waisted suit of the town youth selling cheap German glass and the bright, attenuated costume and high-heeled shoes of the ample ady camping with her family under an unpainted wagon, in friendly nearness to a pair of oxen peacefully ruminating over hay by the pole of the vehicle, to the huge, black, baggy trousers and scarf-bound, shaggy head of the hide-shod local rustic and the stiff silk, high-waisted dresses and long plaits of his quiet, dignified wife and bonny, smiling daughters.

Standing by the tinman are two distinguished-looking men in short brown, homespun, black-braided jackets and sky-blue trousers, vast and baggy to the knee but fitting tightly to the leg below. They are refugees from eastern

As in all this thirsty land, water is not plentiful and there is only one well where all must drink, regardless of the mud and dirty water round it. Beside the well, upturned to form a water trough, is an immense marble sarcophagus lid. Against one gable-end and close beside a pool of liquid mud, a seller of sustaining sweetmeats glows to the radiant sun as do his glistening wares spread out upon a tray. Seated on the marble edge and cooling their feet in the muddy water of the trough, are four small boys chattering and eating watermelon.

The World's Great Capitals: The Week in Rome

Now and again rumors of an impending dissolution are heard, but these seem to deserve little credit, since the Government is quite satisfied with the present Chamber, in spite of the abstention from its works of about one-third of its members. It is recognized that as a result of events which were unforeseen at the time of the King's speech, containing the program of the legislative work to be carried out by Parliament during the whole session, both the Chamber of Deputies and the Senate passed a great number of bills which were not contemplated at the time when the appeal to the country was made. The country, however, has given little attention to the parlia-

mentary debates because they were regarded as a mere

During the past year the Chamber of Deputies held seventy-seven sittings and approved 354 different bills. The chief measures passed are those creating a new constitutional status and giving larger powers to the executive, the Electoral Reform Bill, the bill extending municof Freemasonry, the radical reform of the Penal Code, the full powers conferred upon the Government with regard to the status of civil servants, the bill conferring the Italian citizenship on the inhabitants of the Dodecanese, the law on labor organizations, the law against political exiles and the new Press Bill.

Within the next five years Rome is to appear as a wonder to all the nations of the earth; this is the precise order given by Signor Mussolini when he installed Senator Filippo Cremonesi as the first governor of Rome. Rome, added the Prime Minister, is to appear vast, ordered, powerful as it was at the time of the First Empire under Augustus. The Augusteum, the Theater of Marcellus, the Capitol and the Pantheon must be cleared of the ugly constructions which sprung up in their proximity during the centuries of Rome's decadence. In five years' time a wide straight line will link the Pantheon and the Piazza Colonna, and a clear view of the old Roman temple will thus be obtained from the main square of Rome.

The majestic monuments of Christian Rome will be isolated from the parasitic and profane buildings which surround them, and the ancient monuments of Roman history will again stand out in their gigantic and solitary grandeur. A new city will rise in the vicinity of ancient Rome, along the banks of the Tiber as far as the shores of the Tyrranean Sea. The historic streets of Rome will be purified by the removal of the "stupid contamination of the tramways," and the most modern means of transport and communications will be provided to join the old with the new town. The longest and widest straight road in the world will link the capital with Ostia, thus establishing direct communication with the Mediterranean Sea. Together with the expansion of the capital, the Governor vill also endeavor to improve the comforts of the inhabitants by the erection of new houses, gardens, schools, baths and playing fields.

A new academy, known as the "Accademia d'Italia," has been created by the Italian Government and will be formally inaugurated by Premier Mussolini on April 21 next. The object of this academy, which will have its headquarters in Rome and will receive an annual subsidy from the state, is to promote and co-ordinate the Italian intellectual movement in the fields of natural science, literature and arts, to preserve the national character according to the traditions of the Italian race and to encourage its expansion and influence abroad.

For this purpose scholarships are to be established both in Italy and in foreign countries; prizes, subsidies and pensions are to be assigned to natural scientists, artists and authors; competitions are to be held every year for expert, literary and artistic works; voyages of exp tion are to be organized, inventions are to be examined and the attention of the Government is to be called upon those which are worthy of consideration. Every two years the academy will submit to the Government the most important literary and artistic and other works, and special prizes will be assigned to the authors.

The members of the academy are to be limited to sixty, all of whom must be of Italian nationality. The first thirty will be nominated by royal decree, at the suggestion of the Prime Minister, and the remaining thirty members will be nominated during the next three years by the existing academicians. Vacancies will be filled in the same way. The academicians will enjoy the privileges and honors of high state officials; they will receive an

+ + +

annual salary of 30,000 lire and will wear a special uniform. The institution of this academy, which greatly resembles the French Academy, will certainly give a great stimulus to intellectual activity. Hitherto the Govern-ment had no other way suitably to honor those who had distinguished themselves in the fields of art, literature and natural science than by creating them senators. The result was that in a short time the Senate lost its political character and became a real academy. The first members of the academy will be Gabriele D'Annunzio, the national hero; Senator Marconi, the great inventor, and Signor Pirandello, the famous playwright.

Letters to the Editor

The Anarchist and "Can-Archist"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: If we look up the word anarchist in the dictionary, we will find this definition:

An anarchist is one who advocates anarchy and aims at the overthrow of civil government. And then if we look down the column at the word anarchy, we will find this:

Absence of government; the state of society where there is no law or supreme power; a state of lawlessness; political

People who can think logically and control their emotions are never anarchists. They know that progress comes in an orderly way through the gradual establishment of law and order—never through the destruction of law and order. Humanity began with a general state of lawlessness, and has struggled for centuries in its effort to substitute law for violence. Naturally, a good many mistakes have been made. Undue enthusiasm has led to reaction against all restraint—even necessary restraint. That is because any governing power able to control the immense numbers of a modern nation becomes so strong and so complex that its operations cannot be checked when they have accomplished their purpose. They always go a little too far. And this provokes reactions, which go far in one direction as the government originally went

in the other. That is what has happened to prohibition. That is why stalwart American citizens who have upheld American principles and fought anarchy and Communism all their lives have suddenly begun to violate an article of the Constitution of the United States. They have not stopped to think things through. If they are willing to break the Constitution for a drink, they have no case against an-archists who believe that their lawless theories will right all the evils in the world. The anarchist sincerely believes that he is serving the good of all mankind. The bootlegger and his patron make no such claim. Self-indulgence is their only aim.

The "can-archists" are, in the last analysis, a much more dangerous criminal class than the an-archists. Nothmore dangerous criminal class than the an-archists. Nothing is further from their thoughts, yet it is true they both defy the law. They are both working to overthrow our Government—the anarchist consciously, the "can-archist" unconsciously. The anarchist, who is deliberately out to destroy Americanism, is accomplishing very the "can-archist," who is thoughtlessly trying to have a good time, is accomplishing a great deal more than he realizes. Not only is he defying the Constitution and the law himself—he is teaching other people to defy them and any other laws they do not like. And I am convinced that the present crime wave is in large part due to the example

the present crime wave is in large part due to the example set by men in outstanding positions who are thoughtlessly violating the Constitution—the fundamental law of the land. Yet these "can-archists" are not deliberate sinners. They are simply good Americans who have not thought out their position. They do not realize where they stand.

I am not writing this as either advocate or opponent of prohibition. All I am advocating is observance of the Constitution of the United States. American law and orderly government are threatened by the prevailing attitude toward the Prohibition Amendment. People who don't believe in prohibition have a perfect right to change that amendment, or the Volstead Act. But so long as that amendment, or the Volstead Act. But so long as there is a Prohibition Amendment in the Constitution or a prohibition law on the statute books, every good American must guide his conduct by them. That is an ordinary EDWARD A. FILENE.

patriotic duty.
